

Adoptium

Project Management Committee

Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2022-February-09

Agenda:

- Approval of minutes from January 19 meeting.
- Approval for publishing information from February 02 abandoned meeting.
- Review of [action items](#) from the previous meeting.
- January CPU release status
 - Tracking issue [adoptium/adoptium#109](#)
 - Respin for 11.0.14.1 (tracking issue?)
- Container base image update policy
 - [adoptium/adoptium#115](#)
- Secure Software Supply chain initiative
- Installers:
 - Discuss adding SLES12 and SLES15. Moving from CentOS8 to Rocky8.
 - [adoptium/installer PR#426](#)
- Marketplace progression
 - Documentation [WIP]
 - i. Marketplace policy document ([html](#)) ([src](#))
 - ii. QVS policy document ([html](#)) ([src](#))
 - iii. Marketplace guidelines document ([html](#)) ([src](#))
 - Product listing [schema](#)
- Should we build and release on Alpine/aarch64?
<https://github.com/adoptium/containers/issues/158>

Action items:

Date	Description	Status
2021-12-01	ACTION: Martijn to speak to Eclipse about finding a new home for PMC documentation and meeting resources currently hosted outside project control.	In progress
2021-12-22	ACTION: PMC to decide which versions of base Debian, RedHat (Fedora/CentOS) and SUSE linux distros to support for installers	In progress
2022-01-05	ACTION: Martijn to pull together a statement of direction for the project's Linux support https://github.com/adoptium/installer/issues/421	Done

Attendees:

- ☒ George Adams - from 14:14
- ☒ Stewart Addison
- ☐ Hendrik Ebberts
- ☒ Tim Ellison
- ☒ Severin Gehwolf
- ☒ Shelley Lambert
- ☒ John Oliver
- ☒ Martijn Verburg

Meeting called to order at 14:03 GMT**Minutes:**

- Approval of [minutes](#) from January 19 meeting.
 - Minus of this meeting were approved.
- Approval of publishing [information](#) from February 02 abandoned meeting.
 - Approved to be published.
- Review of [action items](#) from the previous meeting.
 - Actions from the previous meetings were reviewed and updated.
- January CPU release status
 - Tracking issue [adoptium/adoptium#109](#)
 - Respin for 11.0.14.1 (tracking issue?)
 - i. Builds completed, triaging underway now.
 - ii. Work continuing today to get principal platforms out.
- Secure Software Supply chain initiative
 - Follow on from work that Andrew Leonard is doing on reproducibility, to extend to secure supply chain enhancements.

- Driven by NIST publication and industry demand for improving the development process of critical software.
(<https://nvlpubs.nist.gov/nistpubs/SpecialPublications/NIST.SP.800-218.pdf>)
 - Start with a statement of requirements and early milestones for this topic.
 - Include documenting current practices for community comment and improvement, including intersection with Eclipse Foundation activities.
- Container base image update policy
 - [adoptium/adoptium#11](#)
 - User community often noting that base OS images for Adoptium publications have security updates.
 - The project should have a standard policy for how often the base image is updated. Specifically, how frequently should this be done.
 - Upstream recommendation was to maintain two most recent Alpine versions. How would these be identified by Temurin releases?
 - Proposal is to use the latest version of the base OS only, and refer users how to use the Temurin binaries on other OS versions.
 - ACTION: Martijn to bring the Docker webpage back and include the base OS image update policy there.
 - Agreed that this policy covers all supported architectures for each release.
- Installers:
 - Discuss adding SLES12 and SLES15. Moving from CentOS8 to Rocky8.
 - [adoptium/installer PR#426](#)
 - Informational that these distros are now part of the installer tree in the repo.
 - PMC mindful that there is a possibility for this to span out to cover installers for many alternate distros.
 - ACTION George to bring installers Linux information back to the website documentation.
- Marketplace progression
 - Documentation [WIP]
 - i. Marketplace policy document ([html](#)) ([src](#))
 - ii. QVS policy document ([html](#)) ([src](#))
 - iii. Marketplace guidelines document ([html](#)) ([src](#))
 - Product listing [schema](#)
- Should we build and release on Alpine/aarch64?
<https://github.com/adoptium/containers/issues/158>
 - Given the direction towards aarch64, should we publish binaries for this platform?
 - Question about whether this is being maintained upstream already. Unclear if it is stable in the OpenJDK project, and will pass the AQA vit tests.
 - Propose starting to build as an EA binary to see how stable it is.
- AoB
 - Community scrums will include a variety of times to help accommodate more participants.

Meeting closed at 14:58 GMT
