Project Management Committee

Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2021-May-26

Agenda:

1. Approval of minutes and review of actions items from the previous meeting.
 - a. Proposal to publish rich text minutes, and link from mailing list.
2. Update on TCK access.
3. Milestone 1 build status from [project board](#).
4. First Temurin release status (July 20th outlook).
5. Ampere machine status.
6. Items to raise with the working group.
7. TRSS automated access to build logs - define process ([infra#2195](#))
8. TRSS subdomain certificate - determine Eclipse process ([infra#2166](#))
9. Temurin logo & marketing / DevRel actions

Action items:

Date	Description	Status
2021-05-12	ACTION: George and Sxa will sync up with Andreas to get a hand-over of Cloud9 status	Pending
2021-05-12	ACTION: Tim to create an issue to capture the plan for Docker migration	Pending
2021-05-19	ACTION: Martijn to ask WG to spend on Azure credits for running the API app.	New

Attendees:

- ✓ George Adams (left after 40 mins)
- ✓ Stewart Addison
- ✓ Hendrik Ebberts (30 min late)
- ✓ Tim Ellison
- ✓ Severin Gehwolf
- ✓ Shelley Lambert
- ✓ John Oliver
- ✗ Martijn Verburg

Minutes:

Approval of minutes and review of actions items from the previous meeting.

Minutes were agreed to be an accurate record.

Publishing minutes will be via PDF link on the mailing list.

Update on TCK access.

No known blockers to getting access. Now with Oracle for countersignature.

Microsoft have signed the agreement and submitted to Eclipse.

Further work continues to ensure rebranding of repositories and actions to move from AdoptOpenJDK to Adoptium.

Milestone 1 build status from project board.

Discussion about access control to non-Temurin builds. Requires work on regenerator code to set permissions that are required.

TRSS requires read-only access to the build processes to see build status and console output and report on testing results. Will repurpose AdoptOpenJDK bots for this.

Still waiting for EF to provision macs and windows boxes for TCK testing

Source tree notices are progressing.

API merges are progressing too.

CodeSigning for mac 8 and windows complete, still work to do on 11

Builds are currently undergoing nightly sanity testing.

First Temurin release status (July 20th outlook).

No further progress as we await JCK access.

Windows Ampere Altra machine status.

George has pinged Eclipse to check that they have procured the machine. Money has transferred from Microsoft to Eclipse to cover the cost.

George and Sxa to agree on config, including networking configuration to the supplier before it is shipped to Nine colo.

Items to raise with the working group.

None this week.

TRSS automated access to build logs - define process (infra#2195)

Covered earlier.

TRSS subdomain certificate - determine Eclipse process (infra#2166)

Part of the deep learning project. Needs raising with the Eclipse infrastructure alongside the other DNS moves for adoptopenjdk -> adoptium.net

Machines are fronted by CloudFlare, so we'd need an account on adoptium.net. Talk to EF infra for that.

Temurin logo & marketing / DevRel actions

Meeting with design agency today, who will sketch the logo for Temurin. Covered by initial payment agreement still outstanding with Eclipse.

Flashcards being created. Proposal to do short YouTube videos to explain Adoptium.

Test team doing five min lightning talks about AQAvit. Will record and make generally available.

END
