

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2021-December-15

Agenda:

- Approval of minutes and review of [action items](#) from the previous meeting.
- Status of the AIX JCK testing
- Status of JREs
- Temurin project graduation review
- Linux Installer progress
- Response to log4j vulnerability, including [Eclipse action](#)
- Discussions about Chocolatey installation manager
- Review change of GCC version decision
- Next meeting date (22 Dec or 5 Jan)

Action items:

Date	Description	Status
2021-10-20	ACTION: George to look at providing “obsoletes” RPM packages for publication to JFrog to replace adoptopenjdk	Done
2021-11-10	ACTION: George to submit PR for updates to releasing documentation.	Done

2021-12-01	ACTION: Martijn to speak to Eclipse about finding a new home for PMC documentation and meeting resources currently hosted outside project control.	Open
------------	--	------

Attendees:

- ✓ George Adams - from 14:09
- ✓ Stewart Addison
- ✗ Hendrik Ebbers
- ✓ Tim Ellison
- ✓ Severin Gehwolf
- ✓ Shelley Lambert
- ✗ John Oliver
- ✓ Martijn Verburg

Meeting called to order at 14:05 GMT

Minutes:

- **Approval of minutes and review of [action items](#) from the previous meeting.**
 - Minutes of the previous meeting on 8 December were reviewed and approved.
 - Actions from the previous meetings were reviewed and updated.
 - The “obsoletes” directives are in place for the adoptopenjdk package repository on JFrog.
 - The PMC agreed that at some point this site should be taken down to avoid distributing older versions of the runtimes. This won't be done until the new adoptium repository is well established and mature.
 - George will check that all items he intended to add to release documentation is completed.
- **Status of the AIX JCK testing**
 - Having spoken to IBM, the JCK should now be ready to run the tests on AIX again.
 - ACTION: Stewart to request that Mikael pulls the latest versions of JCK material from Oracle's private site before the AIX tests are re-run.
- **Status of JREs**
 - JRE 17 builds are ready to be published. The Github issue will be updated and the blog post to follow.
- **Temurin project graduation review**
 - No update. The review is being scheduled by the EMO and tracked by [EMO issue #165](#)
- **Linux Installer progress**
 - The gpg keys issue has been resolved with JFrog, and cacerts is now published with correct metadata.
 - Debian installers have been published, and the repos cleaned of development work to ensure only accurate packages are in place.

- There is an outstanding problem with the CNAME we are using for the packages.adoptium.net domain when using the “wget” command. Sxa to help investigate the cause.
- Documentation is being started to inform people of the new location.
- **Response to log4j vulnerability, including [Eclipse action](#)**
 - Full scans of Adoptium repos have been conducted, and STF was the only area impacted. In particular, our CI system is not affected.
 - i. STF resolved since Dec 15, 2021 via [adoptium/STF#21](#)
 - AQA tests were potentially running affected versions of the log4j library via third-party dependencies, and AQA has been updated to only use dependencies using the secure version of log4j.
 - ACTION: Tim to update the Eclipse wiki with Adoptium projects’ status on log4j vulnerability.
- **Discussions about Chocolatey installation manager**
 - Chocolatey is distributing millions of Windows installs of AdoptOpenJDK and Adoptium Temurin, and it was pointed out to the PMC that these are not being kept up to date.
 - These are maintained by an individual rather than being official packages of the Chocolatey project.
 - The maintainer, Johan, is happy to mark them as deprecated but not keen to start installing Temurin as a direct replacement of the old AdoptOpenJDK installs, preferring to keep the transition an explicit step for users.
 - Maintainer is happy to transfer the packaging code for Temurin into Adoptium organization, and there was some discussion about the desirability of that proposal.
 - Obsoleting the AdoptOpenJDK packages will require Johan to go back in Github history and push the obsolete metadata.
 - George proposed that the packaging work is growing to the point where it may warrant a new project under Adoptium TLP. The PMC agreed that if this work comes to Adoptium we should further discuss a new packaging project.
 - Johan can be invited to a future PMC meeting to discuss the way forward.
- **Review change of GCC version decision**
 - Discussion of using the latest version of GCC versus a specific GCC v8.
 - Upstream documentation has an opinion of the GCC version supported.
 - Different companies and distros have their own opinion about the best approach.
 - ACTION: sxa to raise the question on jdk-updates-dev or jdk-dev to seek opinions and come back with a recommendation for which GCC version should be used in Temurin builds.
- **Next meeting date (22 Dec or 5 Jan)**
 - Next meeting will be on 22 Dec. Martijn to chair the meeting.
 - Shelley will invite Andrew Leonard to come and talk about the reproducible build work at that meeting.

Meeting closed at 14:48 GMT
