

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2022-Nov-09

Agenda:

- Welcome Andrew Leonard to the PMC.
- Approval of [minutes](#) from November 2nd meeting.
- Review of [action items](#) from previous meetings.
- October PSU release status
 - Release checklist ([adoptium#179](#))
 - Platform status ([adoptium#180](#))
- UBI docker images status ([containers#308](#))
- Debian container support ([containers#313](#))
- Support of Loongson architecture builds ([infrastructure#2806](#))([temurin-build#3134](#))

Action items:

Date	Description	Status
2022-07-06	ACTION: Stephanie to investigate the difference in ECC algorithms available in the Alpine MUSL 8u build (temurin-build#3002)	Close out
2022-07-20	ACTION: George to keep the PMC informed of progress on the repository-settings-as-code work with EF infra. https://gitlab.eclipse.org/eclipsefdn/helpdesk/-/issues/1531	In progress

2022-10-12	ACTION: Tim to review what can be taken over from Documentation repos to website-v2 and then arrange for them to be archived.	Closed
2022-10-12	<p>ACTION: George and Stephanie will be assigned an issue (by Martijn) to refactor the 8u repository to move Alpine support out of main and into a separate branch/repo.</p> <p>Split out Alpine Port to its own branch · Issue #11 · adoptium/jdk8u (github.com)</p>	Open

Attendees:

- ☒ George Adams
- ☒ Stewart Addison
- ☒ Carmen Delgado (guest)
- ☒ Tim Ellison
- ☒ Severin Gehwolf
- ☒ Shelley Lambert
- ☒ Andrew Leonard
- ☒ John Oliver
- ☒ San Hong Li
- ☒ Martijn Verburg
- ☒ Lan Xia

Meeting called to order at 14:02 GMT

Minutes:

- Welcome Andrew Leonard to the PMC.
 - Andrew was welcomed to the meeting as a new PMC member.
- Approval of [minutes](#) from November 2nd meeting.
 - Minutes of the meeting were approved.
- Review of [action items](#) from previous meetings.
 - Actions were reviewed and updated.
 - Martijn asked how we decide which items should be tracked by the PMC. Tim explained that it remains the case that any PMC member can ask for an item to be added to the agenda and tracked if they believe it is important to the overall state of the projects - we don't have a set of criteria *per se*.
- October PSU release status
 - Release checklist ([adoptium#179](#))
 - Platform status ([adoptium#180](#))
 - AIX and Solaris SPARC are still in progress.
 - Some scripts are seen to be failing on SPARC. Work ongoing.

- Noted that the WG are talking to the users of Solaris about their requirements to ensure we continue to provide the binaries they need. Any changes to required platforms will be brought back to the PMC.
- UBI docker images status ([containers#308](#))
 - The dockerfiles are now being created as part of the container generation processes.
 - Local testing of the UBI containers remains to be completed, and then we will notify Dockerhub that they can put them into their test environment.
 - Confirmed that these are based on UBI9-minimal.
- Debian container support ([containers#313](#))
 - End users have requested that we provide Debian base OS images.
 - Noted that we try to reduce the number of OSes that we build and test in the project based upon experiences at AdoptOpenJDK since the possible set is huge - and each additional base OS requires build and test effort.
 - We don't currently provide a clear definition of the requirements for creating a new container image for Temurin. Each case is considered by the PMC on it's merit.
 - Creating a Debian-based image would be a significant overlap with the Ubuntu images that are created and well-tested by the project.
 - Would like a better understanding of the reason why these are being requested, and we can provide a migration guide for those moving from a Debian image to an Ubuntu image.
- Support of Loongson architecture builds ([infrastructure#2806](#))([temurin-build#3134](#))
 - E-mail discussion underway with Loongson. Further details will be brought back to the PMC as appropriate.
- E-mail from Wayne about compliance committers
 - EMO have raised a concern that people are being nominated as committers without public discussion, nomination, and vote.
 - The EMO ask that these are done in a public location and not on PMC resources.
 - Stewart will confirm with the [EMO that the interaction processes we have documented](#) are still valid.
 - George will point to the public minutes of the meeting where this decision was made to ensure they are aware of the process in action.
- AoB
 - Stewart: There is a Google calendar created for the release cycles and the phases of release suitable for project developers to follow along with the progress.
 - i. This is also expected to be helpful to Eclipse folks to see when we will have demands on their services.
 - Lan: How do we know when a new machine is ready to be included in the build farm?
 - i. It will go through standard configuration and adoption.
 - ii. Should put it through some additional tests to check it is behaving correctly before it gets opened to schedule build/tests jobs.
