Meeting called to order at 14:04 GMT

Minutes:

- Approval of minutes from February 1st meeting.
 - APPROVED
- Review of [action items](#) from previous meetings.
 - Container image discussion - DEFERRED
 - Adoptium website security concerns - sxa has firewalled the HTTP server
 - PMC access - Shelley to raise Eclipse issue
 - Plan a “Release Notes V2” piece of work for follow-on activities (Shelley) - done at <https://github.com/adoptium/adoptium/issues/207> - Beth to create release notes for 18 to keep API happy
- Release notes status:
 - JDK18 workaround (Beth will create release notes for last 18)
 - Sample rendering: <https://adoptium.net/temurin/release-notes/?version=jdk-17.0.6+10>
 - Sample API link: https://api.adoptium.net/v3/info/release_notes/jdk-17.0.6+10?vendor=eclipse
 - Filters out test bugs and exclusion list changes for test failures
 - Aim to have a (human-generated?) list of “notable changes” in the release notes json for V2
 - Discussions ongoing with other parties about consuming our JSON from the API

- Please add any thoughts for futures into adoptium/adoptium issue 207
- AIX 7.1
 - sxa to contact IBM (including Semeru team) and determine if moving up to 7.2 for the base level for builds is reasonable.
 - Will target April release for this and aim to reprovision the 7.1 test systems with AIX 7.3 since we do not currently have any of those.
- AdoptOpenJDK HTTP/301 Redirect
 - We are receiving ~280k/month unique visitors going to adoptopenjdk.net
 - ~170k of those immediately clicking the big button to redirect to Adoptium/Temurin
 - Many of the other 110k that we can track are going to e.g. latest release page
 - GA to post at blog.adoptopenjdk.net to tell users how to find earlier (out of support) JDK releases
- AOB:
 - Nothing extra for this week.
