

# Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

**Date:** 2022-May-04

## Agenda:

- Welcome Sanhong and Lan to the PMC!
- Approval of minutes from May 4 meeting.
- Review of [action items](#) from the previous meeting.
- Status update for April PSU release.
  - Release checklist ([adoptium/adoptium#139](#))
  - Platform status ([adoptium/adoptium#140](#))
  - Public communications during a release.
- [Docker image deprecation](#) (deferred)
- Enabling stale bot on support repo ([adoptium/adoptium#141](#)) (deferred)
- Add website-v2 analytics ([adoptium/website-v2#447](#))
- Solaris x86 platform

## Action items:

Date	Description	Status
2022-03-09	ACTION: Shelley to start conversations on how to provide feedback to the OpenJDK community on AIX development branch testing.	In Progress

2022-03-09	ACTION: George will document how the Alpine Linux JDK8u release was built and the limitations of the current build system that required this approach.	Open
2022-04-13	ACTION: George to confirm that repo settings have been reviewed and set appropriately, and that admin rights are relinquished (or shared) accordingly.	Open
2022-04-20	ACTION: Tim to contact Wayne and EMO to review the org structure and admin rights across repositories.	In progress

### Attendees:

- ☒ George Adams - Joined from 14:20
- ☐ Stewart Addison
- ☐ Hendrik Ebberts
- ☒ Tim Ellison
- ☒ Severin Gehwolf
- ☒ Shelley Lambert
- ☒ John Oliver
- ☒ San Hong Li
- ☐ Martijn Verburg
- ☒ Lan Xia

### Meeting called to order at 14:05 BST

### Minutes:

- Welcome Sanhong and Lan to the PMC!
- Approval of minutes from April 27 meeting.
  - Minutes of the meeting were approved
- Review of [action items](#) from the previous meeting.
  - Noted that admin powers were helpful in this release. This might not be part of the standard Eclipse process to allow project leads admin powers.
  - Useful to have people across timezones.
  - Review should include branch permissions, protected, reviewers set, etc.
  - Tim to raise an issue in adoptium/adoptium to discuss.
- Status update for April PSU release.
  - Release checklist ([adoptium/adoptium#139](#))
  - Platform status ([adoptium/adoptium#140](#))
  - Long haul of this release given number of versions simultaneously being released.
  - New column for tarball published, and 3 or 4 more platforms due imminently.

- AIX still delayed as limited compliance hardware, and issues during reboot. These are Skytap Azure machines so will need MSFT help to resolve. George has a P1 ticket open to help resolve.
  - Maybe quicker to recreate the machines.
  - Sxa to investigate getting OSUOSL AIX machines back
- aarch/macos also underway.
- Some machines required recreating during the release due to configuration issues.
- Issue #140 is up to date.
- Ensuring the workload is equitably distributed across the community members. Proposal to nominate tertiary level of platforms to ensure focus.
- Public communications during a release.
  - Public are following the issue #140 to track progress and forward project the availability of binaries.
  - Ideally there would be a dashboard that shows progress of the releases.
  - Further benefits by splitting up the pipelines to allow decoupled advances of prioritised platforms and visions.
  - Further opportunities to automate the manual tests of the JCK.
  - Noted that TKG can utilize dynamic agents efficiently so can spin up machines to reduce testing time.
- [Docker image deprecation](#) (AdoptOpenJDK)
  - George presented a plan for deprecating obsolete AdoptOpenJDK Docker images.
  - Discussion of timeline for achieving this, and the impact to end users who depend upon these images.
  - Also noted that Dockerhub run some additional tests on the images, we should not be reproducing them
- Enabling stale bot on support repo ([adoptium/adoptium#141](#)) (deferred)
  - Proposal to make support requests stale in 90 days, and then close them after a further 30 days.
  - Issues that need an upstream report will be exempt.
- Add website-v2 analytics ([adoptium/website-v2#447](#))
  - Existing tag is for EF usage and injection of their analytics and cookie management.
- Solaris x86 platform
  - This platform is also used by Delphix, although not as much as the SPARC.
  - It continues to be a burden on the testing workload, so need to ensure it is a platform in demand.
- AoB
  - Usage of AQAvit logo for third-party usage.
  - This logo is covered by the overall Eclipse logo usage policy, question about how it should be used in the context of AQAvit verification.

**Meeting closed at 15:05 BST**
