## Meeting called to order at 14:03 BST

### Minutes:

- Approval of [minutes](#) from April 12th meeting.
- Review of [action items](#) from previous meetings.
- Review of [GitHub issues flagged for PMC agenda](#).
- April CPU release - 18 April 2023
  - Release champion/co-ordinator Andrew Leonard
  - Seeking clarity on shipping openjdk test images of GA builds
    - i. Discussion of use-case of test images, and if they are reviewed for full content.
    - ii. Useful for customers to rerun AQAvit on a published Temurin build on their own hardware to check the platform is behaving as expected, rather than requiring to pull the files from Jenkins.
    - iii. Requires further async discussion - agreed to defer publication of these until resolved.
  - ACTION: George will check through the CI pipeline and confirm that the testimage contains shippable content.
- Update: OtterDog request to EF ([gitlab#2939](#))
  - <https://github.com/adoptium/eclipsefdn-private>
  - Private repository has been created, and EF infra will arrange time to instruct on how to use it.
- AoB
  - adoptium.net issue remediation status was shown by gdams.
    - i. The report is live updated so we can see progress on fixes.
    - ii. Moving TRSS into Docker will help to resolve a number of the reported issues. Johnno is fixing issues relating to the staging server.
    - iii. Would be preferable to run the TRSS image on a hosted server rather than a bare machine.
