

# Adoptium

## Project Management Committee

### Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

Date: 2021-November-10

#### Agenda:

- Approval of minutes and review of [action items](#) from the previous meeting.
- Status of the October PSU release.
  - Checklist [adoptium/adoptium#83](#)
  - Platform status [adoptium/adoptium#81](#)
- Updates required to releasing documentation
- Now that we are past busy October, assess/prioritize work items for remainder of year (public Jenkins server, installers, Adoptium marketplace work)

#### Action items:

Date	Description	Status
2021-06-30	ACTION: Hendrik to write a README for how to get to the Zenhub views of issues in the repos. for newcomers. Issue: <a href="https://github.com/adoptium/adoptium/issues/60">https://github.com/adoptium/adoptium/issues/60</a>	Open
2021-08-11	ACTION: Tim to bring the proposed list of supported platforms to a future PMC meeting. Based upon the program plan.	Done
2021-10-06	ACTION: George to look at the publication of nightlies earlier in the pipeline.	In progress

2021-10-20	ACTION: George to confirm TCK mailing lists with Mikael to ensure he's up to speed on problematic issues	Done
2021-10-20	ACTION: George to look at providing "obsoletes" RPM packages for publication to JFrog to replace adoptopenjdk	In progress: Checked for .deb
2021-10-20	ACTION: George/John to share "API kicking" command to PMC so that web site will pick up new updates in a timely manner	Done
2021-11-10	ACTION: George to create repository for hosting the Linux install files prior to pushing them to a yum/apt repository	Open
2021-11-10	ACTION: George to submit PR for updates to releasing documentation.	Open

### Attendees:

- ✓ George Adams - Joined at 1410
- ✓ Stewart Addison
- ✗ Hendrik Ebberts
- ✗ Tim Ellison
- ✓ Severin Gehwolf
- ✓ Shelley Lambert
- ✓ John Oliver
- ✗ Martijn Verburg

### Meeting called to order at 1403 GMT

### Minutes:

- Approval of minutes and review of action items from the previous meeting.
  - Minutes of the previous meeting were accepted as a true record.
- Hendrik to take over the zenhub action as he is managing the documentation repo
- All platforms other than Solaris (x64 and SPARC) JDK8 and AIX JDK17 complete and shipped, including JREs. Solaris should go out in the next day or so. Docker images and homebrew all released.
- Linux installers: Some gotchas with TestContainers on secondary platforms, but those should not block shipping. TestContainers may have added more platforms since we last spoke to them. Close to getting the rpm/deb files posted into the github repository. Potential for enabling an experimental mode in TestContainers to activate.
- George to create a repository for holding the rpm/deb install files before we move to phase 2 and get the artefacts published to JFrog. Possibly look at using a CNAME at adoptium.net to point to JFrog but need to check what will be in there are valid for hosting via adoptium.net.

- XLC license obtained for Skytap AIX machines - George to raise ticket for deployment to TCK infrastructure then we can get the IBM Garage ones decommissioned
- Items for rest of the year:
  - Installers (discussed above)
  - JREs for JDK17 - decision was previously based on practicalities of shipping them
  - Marketplace - website work (GA) / marketplace mockup with DISCO API (GE) / Community center (BE) / Other API work / AQA/Vit certification workflow

**Meeting closed at 1450 GMT**
