

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2022-May-11

Agenda:

- Approval of minutes from May 4 meeting.
- Review of [action items](#) from the previous meeting.
- Update from incubator projects (Sanhong).
- Status update for April PSU release.
 - Release checklist ([adoptium/adoptium#139](#))
 - Platform status ([adoptium/adoptium#140](#))
 - Retrospective ([adoptium/adoptium#138](#))
- Discuss 18.0.1.1, 17.0.3 and 11.0.15
- SLAs or other agreements/commitments with JFrog / Docker (related to [PS3.1](#))
- Temurin marketplace status
- Informational: Website analytics

Action items:

Date	Description	Status
2022-03-09	ACTION: George will document how the Alpine Linux JDK8u release was built and the limitations of the current build system that required this approach.	Open

2022-04-13	ACTION: George to confirm that repo settings have been reviewed and set appropriately, and that admin rights are relinquished (or shared) accordingly.	Open
2022-04-20	ACTION: Tim to contact Wayne and EMO to review the org structure and admin rights across repositories.	In progress

Attendees:

- ☒ George Adams
- ☒ Stewart Addison
- ☐ Hendrik Ebberts
- ☒ Tim Ellison
- ☒ Severin Gehwolf
- ☒ Shelley Lambert
- ☐ John Oliver
- ☒ San Hong Li
- ☐ Martijn Verburg
- ☒ Lan Xia

Meeting called to order at 14:03 BST

Minutes:

- Approval of minutes from May 4 meeting.
 - Minutes of the previous meeting were approved as a true record.
- Review of [action items](#) from the previous meeting.
 - Infrastructure issue has been opened to review the repo access rights and settings.
 - Also need to audit the Jenkins tokens and access to ensure they are still required. Will be the subject of a future PMC discussion item.
- Update from incubator projects (Sanhong).
 - Sanhong has invited colleagues to update the PMC on the fast start-up incubator. This section was recorded for the benefit of PMC members only who were unable to attend this meeting.
 - Collaboration is happening between contributors who are looking at opportunities to integrate enhancements to CDS and startup analysis.
 - Have started to make upstream contributions based upon this work into GraalVM and OpenJDK.
- Status update for April PSU release.
 - Release checklist ([adoptium/adoptium#139](#))
 - Platform status ([adoptium/adoptium#140](#))
 - Retrospective ([adoptium/adoptium#138](#))

- Solaris SPARCv9 and AIX machines, plus 11 (new release) and 18 on mac aarch64 remain to complete the April release.
- Installers and docker images have been published. Receiving new requests for docker images, especially Alpine arm images.
- Note that credentials to push to Docker Hub need reviewing.
- Continuing to get requests for additional base images, but referring to the advice to use the standard images and jlink etc as described in the blog entry.
- Retrospective is being scheduled starting next week.
- Discuss 18.0.1.1, 17.0.3 and 11.0.15
 - Java 18 has a new GA tag on 18.0.1.1 which is believed to contain one Windows patch (null streams) already fixed in OpenJDK but no plans for upstream to respin.
 - Consensus in OpenJDK is that this fix is left for downstream builders to decide whether to pick up this patch. There is a workaround for this.
 - PMC agreed that no plan be made to respin the release now, but will keep a watch on community reports.
- SLAs or other agreements/commitments with JFrog / Docker (related to [PS3.1](#))
 - Part of SSDF to review security of artefact redistributors. Requires knowledge of the agreement with these entities. Check with gdams or EF staff about that.
- Temurin marketplace status
 - Need to re-run AQAvit verification runs and capture the tap files for publication. These will be pushed to the release repos.
 - Only verify the April releases, and do them in the platform priority order as per a release.
 - Once the tap files are ready JohnO can run the scripts to convert to marketplace json format and test end to end.
- Informational: Website analytics
 - Discussion of the analytics being collected for website users and how we can use this in the future.

Meeting closed at 14:51 BST
