### Meeting called to order at 14:06 GMT

### Minutes:

- Approval of minutes from [Dec 22](#) and [Dec 15](#).
  - Minutes from Dec 15 meeting were approved.
  - Minutes from Dec 22 meeting were approved.
- Review of [action items](#) from the previous meeting.
  - Martijn in discussion with EF infra about hosting office apps.
  - Actions were reviewed and updated.
- Update on [Temurin incubator graduation review](#).
  - No update. Awaiting response from EF.
- [RPM add CentOS/RHEL 6 for x64](#)
  - Discussion of how to deal with end of life distros and the dependencies from installers. Should we push newer builds of Temurin to these?
  - Industry norm is to push installers back to earlier versions. This would result in many matrixed installers for base plus Java version etc. etc.
  - Should aim to be as lean as possible, to avoid support issues and setting expectations.
  - Widen discussion to include Severin and others with the appropriate background to advise before making a final decision.
  - ACTION: Martijn to pull together a statement of direction for the project's Linux support
- [\[linuxNew\] add support for Ubuntu Impish](#)

- Deferred until the broader Linux support discussion has been had.
- [Update docker file Fedora 33 to F35 as Fedora 33 is nearing EOL · Issue #397 · adoptium/installer · GitHub](#)
  - Proposal is to move to Fedora 35 as the most appropriate build environment. No objections from the PMC. Aware that infra issues on this platform have been resolved recently.
- <https://adoptium-v2.netlify.app/> walkthrough/feedback
  - Demo of markdown powered website, enabling people to easily modify each page.
  - Good basis for design work and integration with existing documentation efforts.
- Question on Alpine musl port work (in Slack)
  - Deferred until next week
