

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2023-Feb-22

Agenda:

- Approval of [minutes](#) from February 8th meeting.
- Review of [action items](#) from previous meetings.
- Linux/x64 build levels for JDK20/21
- Jenkins migration -> ci.adoptium.net
- AoB

Action items:

Date	Description	Status
2023-01-18	Owner TBC: Define process for migration from adoptopenjdk docker repositories based on AdoptOpenJDK docker deprecation strategy	Pending Tim’s return
2023-01-18	George to review Adoptium website security concerns (GA/SXA/TE) for main web site, and TRSS.	In progress
	Produce top level contributing guide	TODO
2023-02-15	SXA to check that Temurin AIX can build on AIX v7.2	Done

Attendees:

- ☒ George Adams
- ☒ Stewart Addison
- ☒ Carmen Delgado (guest)
- ☒ Tim Ellison
- ☐ Severin Gehwolf (apologies)
- ☒ Shelley Lambert
- ☐ Andrew Leonard
- ☒ John Oliver
- ☒ San Hong Li
- ☐ Martijn Verburg
- ☐ Lan Xia

Meeting called to order at 14:04 GMT

Minutes:

- Approval of minutes from February 8th meeting.
 - Minutes of the previous meeting held on Feb 8th were approved.
- Review of [action items](#) from previous meetings.
 - Shelley noted that there is an issue for producing the new contributor guide. This does not need to be tracked by the PMC.
 - The AIX build on v7.2 is being tracked in issue [temurin-build#3261](#), and can be marked as 'done' here.
- Linux/x64 build levels for JDK20/21
 - Building Temurin on CentOS 6 at the moment. Note that CentOS 6 is out of service. Proposal to move onto CentOS 7 from JDK20.
 - Implications are that it will require a later glibc version for the runtime - unless the default C runtime is backlevelled explicitly.
 - Goal to get this in place for JDK20 ahead of the LTS JDK21. This will give an opportunity to judge user feedback by making this change at JDK20 (non-LTS) level.
 - PMC agreed with the proposal. Asked that Severin is also consulted for this decision.
- Jenkins migration -> ci.adoptium.net
 - Awareness to the PMC that the move from domain name "ci.adoptopenjdk.net" to "ci.adoptium.net" is nearly completed, with redirects from the old domain where possible. No other changes planned to the underlying systems, just the DNS changes.
 - The old data in TRSS will remain with references to adoptopenjdk.net
 - Also noted that ssh to the old domain will require updating due to the nature of the redirect via CloudFlare. Can still reach via explicit IP port. This was deemed acceptable by the PMC.
 - Few outstanding PRs for this.
- AoB

- George advised that he will be promoting the deprecation of 32-bit Windows upstream shortly, via a JEP, and is looking for support from the PMC members. This reflects the position of the Temurin build plan.
 - i. https://github.com/microsoft/openjdk-proposals/blob/main/deprecate_32_bit/Deprecate_32-bit_Proposal_JEP.md
