

# Adoptium

## Project Management Committee

### Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

Date: 2021-September-01

#### Agenda:

- Approval of minutes and review of [action items](#) from the previous meeting.
- Closing out the July PSU release.
  - Issue [adoptium/adoptium#57](#)
- Review of Docker base OS decision & Alpine/glibc-based images
- JDK17 - TCK materials, plan for Sept release
- Informational: upcoming participation (need to add good first issues):
  - Outreachy (October contribution period, Winter 2021 term)
  - CanOSP (Sept kickoff, Fall 2021 term)
  - Cyberland Open Source Camp (<https://cyberland.ijug.eu/2021-09-open-source-camp/>)
  - Grace Hopper Celebration Open-source day (October 1)

#### Action items:

Date	Description	Status
2021-06-30	ACTION: Shelley to write a README for how to get to the Zenhub views of issues in the repos. for newcomers. Issue: <a href="https://github.com/adoptium/adoptium/issues/60">https://github.com/adoptium/adoptium/issues/60</a>	Open
2021-08-11	ACTION: George to propose the target for Alpine and the way it is produced for Java 8 and Java 11 onwards.	In progress

	In progress: <a href="https://github.com/adoptium/temurin-build/issues/2688">https://github.com/adoptium/temurin-build/issues/2688</a>	
2021-08-11	ACTION: Tim to bring the proposed list of supported platforms to a future PMC meeting. Based upon the program plan.	Open
2021-08-18	ACTION: George to document the Windows docker base image plan and explanation for version selections.	Completed

#### Attendees:

-  George Adams
-  Stewart Addison
-  Hendrik Ebberts
-  Tim Ellison
-  Severin Gehwolf
-  Shelley Lambert
-  John Oliver
-  Martijn Verburg

#### Meeting called to order at 14:04 BST

#### Minutes:

- Approval of minutes and review of [action items](#) from the previous meeting.
  - Minutes of the previous meeting were approved.
  - Discussion of ongoing discussion of producing Alpine glibc images.
  - ACTION: Martijn to reverse the code changes in the containers repo for Alpine glibc support, and withdraw the Docker hub PR for the container. Write a blog post explaining why this is not being produced, but how it can be recreated if required.
- Closing out the July PSU release.
  - Issue [adoptium/adoptium#57](#)
  - Work underway at the moment mainly related to JREs for 11 on additional platforms. Current status depicted in [adoptium/adoptium#68](#). Outstanding releases as follows:
    - JREs for 11 (Only Windows64 out now)
    - Solaris8 still in progress
    - AIX JDK16 not yet available
    - Arm32 testing not yet started for JDK11/16
    - Arm32 builds for JDK8 not yet run
- Review of Docker base OS decision & Alpine/glibc-based images
  - Discussed earlier.
- JDK17 - TCK materials, plan for Sept release
  - JCK17 is not currently available to the Temurin-compliance project.
  - Request to Mikael to download once the Oracle site is available.

- In the meantime running AQAvit tests on the Java 17 codebase. Noted that we are close to starting the Java 17 release process for Adoptium.
- Question regarding infrastructure in general, and MacOS M1 TCK testing in particular.
- ACTION: sxa to raise a request with EF Mikael to get the compliance infrastructure in place for Java 17.
- Informational: upcoming participation (need to add good first issues):
  - Outreachy (October contribution period, Winter 2021 term)
  - CanOSP (Sept kickoff, Fall 2021 term)
  - Cyberland Open Source Camp  
(<https://cyberland.ijug.eu/2021-09-open-source-camp/>)
  - Grace Hopper Celebration Open-source day (October 1)
  - Programs starting in the next few months that will attract new people looking for good first issues and supporters in the community.
  - Everyone invited to create new issues describing todo work and project work that can be used in these areas. Use the Good First Issue template as a starting point.  
<https://github.com/AdoptOpenJDK/website-adoptium-documentation/blob/main/first-timers-support/index.adoc>
- AOB
  - MacOS signing being handled by George is currently open.
  - Brief discussion of the FAQ being published.
  - Question about opening up the locked down build pipelines to keep developers productive when looking to run grinders etc. Propose to use credentials to grant access.
  - Noted that the builds are backing up, and that people looking at problems are currently focused on compliance work. Without testing results in TRSS we will lose the history for assisting triage during a release.
  - Martijn still making progress on the Linux installer. Soon will need a solution for where to host the packages when available (EF repo and JFrog being evaluated).

**Meeting closed at 14:47 BST**
