

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2023-Mar-15

Agenda:

- Approval of [minutes](#) from March 8th meeting.
- Review of [action items](#) from previous meetings.
- Review of [GitHub issues flagged for PMC agenda](#).
- Temurin v20 release
 - OpenJDK tag expected 21 Mar 2023. Possibly b36.
 - Release champion: Scott Fryer
 - Release checklist ([adoptium/adoptium#215](#))
 - Release status per platform ([adoptium/adoptium#TBD](#))
- AdoptOpenJDK docker org status
- Handling security vulnerability issues
 - <https://www.eclipse.org/security/>
- AoB
 - JDK8 zlib upgrade?
 - Docker image update delays

Action items:

Date	Description	Status
2023-01-18	Owner TBC: Define process for migration from adoptopenjdk docker repositories based on AdoptOpenJDK docker deprecation strategy	Pending Tim’s return

2023-01-18	George to review Adoptium website security concerns (GA/SXA/TE) for main web site, and TRSS.	In progress
2023-03-01	ACTION: San Hong to investigate availability of RISC-V machine in Alibaba Cloud for Temurin compliance testing.	Done
2023-03-08	ACTION: Tim to review names on the private security vulnerability channel, propose changes on the #pmc channel, and action them.	Done

Attendees:

- ☒ George Adams
- ☒ Stewart Addison
- ☒ Carmen Delgado (guest)
- ☒ Tim Ellison
- ☒ Severin Gehwolf
- ☐ Shelley Lambert
- ☐ Andrew Leonard
- ☐ John Oliver
- ☒ San Hong Li
- ☐ Martijn Verburg
- ☐ Lan Xia

Meeting called to order at 14:04 GMT

Minutes:

- Approval of [minutes](#) from March 8th meeting.
 - Minutes of the meeting were approved.
- Review of [action items](#) from previous meetings.
 - Action items were reviewed and updated.
- Review [GitHub issues flagged for PMC agenda](#).
 - <https://github.com/adoptium/containers/issues/329>
 - i. No desire to deprecate the original tag.
 - ii. Noted that version 1809 is in support for further 1.5yrs.
 - iii. The demand for the new tag is deemed low, as it is well known as the original 1809 name.
 - iv. DECISION is to not add a further tag.
 - <https://github.com/adoptium/adoptium-support/issues/731>
 - i. Not doing anything special during archiving of build system artefacts.
 - ii. Doesn't appear to be a significant problem, and the user has a workaround for their specific use case by repackaging our default.
 - iii. DECISION is to decline the request.

- Temurin v20 release
 - Pre-release activities progressing as expected. No news to report at present.
 - Keep a watch as a PMC item in future meetings until successful delivery.
- AdoptOpenJDK docker org status
 - Docker are removing the free tier of team org on Dockerhub as used by the AdoptOpenJDK organisation.
 - This would remove a well-used set of archived images and the build images.
 - Team Plan would be \$300/yr to maintain - giving access to five users.
 - Should move the build images to another provider anyway. Suggest Github container hosting.
 - PMC would prefer to retain team membership and raise the expense implications to the WG SC meeting.
- Handling security vulnerability issues
 - <https://www.eclipse.org/security/>
 - Reports to EF go to security@eclipse.org
 - Reminder to PMC that handling of a security vulnerability issue is done in private Bugzilla for tracking. This was recently confirmed by EF Mikael.
 - These should be used to provide audit trails of timelines and decisions.
- AoB
 - JDK8 zlib upgrade?
 - i. PR is in to OpenJDK to update the zlib version to resolve a vulnerability in that dependency.
 - ii. Decisions to include that version in OpenJDK 8u (or other versions) are made in the OpenJDK Vulnerability Group. If it is fixed/not fixed there Temurin will pick up with the same reasoning. No plans to make independent analysis.
 - iii. PMC members will ensure that such vulnerabilities are flagged upstream.
 - Docker image update delays
 - i. Sxa raised concerns that Docker had spent time updating the base OS images for Temurin.
 - ii. Further discussion took place of the process they follow to update official images.
 - iii. Tim noted that references to the process have been added to the Adoptium FAQ, and users should be referred to that if there are questions about Docker's processes.
 - AQAvit official releases
 - i. Carmen asked about a plan for the release of AQAvit. Shelley confirmed that this is still in progress.
