

# Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

Date: 2021-September-29

## Agenda:

- Approval of minutes and review of [action items](#) from the previous meeting.
- Update on incubator project from Sanhong.
- Closing out the July PSU release.
  - Issue [adoptium/adoptium#57](#)
- Java 17 release
  - Checklist: [adoptium/adoptium#73](#)
  - Platform Status: [adoptium/adoptium#74](#)
- [Changing default download](#) from Temurin 11 to Temurin 17.
- How to migrate AdoptOpenJDK.net users?
- API usage discussion.
- Source archive [download](#)
- Lots of additional comments on shipping JREs - are we decided?

## Action items:

Date	Description	Status
2021-06-30	ACTION: Shelley to write a README for how to get to the Zenhub views of issues in the repos. for newcomers. Issue: <a href="https://github.com/adoptium/adoptium/issues/60">https://github.com/adoptium/adoptium/issues/60</a>	Open

2021-08-11	ACTION: Tim to bring the proposed list of supported platforms to a future PMC meeting. Based upon the program plan.	Open
2021-09-22	ACTION: George to document some common installer problems in an issue to support further automated quality testing.	Open

#### Attendees:

- ✓ George Adams
- ✓ Stewart Addison
- ✗ Hendrik Ebberts
- ✓ Tim Ellison
- ✓ Severin Gehwolf
- ✓ Shelley Lambert
- ✗ John Oliver
- ✗ Martijn Verburg
- ✓ San Hong (Guest)

#### Meeting called to order at 14:04 BST

#### Minutes:

- Approval of minutes and review of [action items](#) from the previous meeting.
  - Minutes of the previous meeting were approved as a true record.
  - Actions arising were reviewed and updated.
- Update on incubator project from 李三红(三红) Sanhong.
  - Sanhong was invited as a guest to provide an update on the incubator project.
  - Alibaba and Google have been participating in the project regularly.
    - Google is currently open sourcing additional code to the fast startup work.
    - Alibaba is working on a static analysis tool for GraalVM (depends on some upstream patches to be merged).
  - The goal of the incubation project is to allow companies to have a “playground” to allow projects/ideas to mature into their own projects where appropriate.
  - The incubator project has been focussing on JDK11 and intends to add support to later JDK versions as well.
  - No concerns were raised, and no current requests for additional funding or resources were identified.
- Closing out the July PSU release.
  - Issue [adoptium/adoptium#57](#)
  - Very close to complete now. Last checks underway on Solaris/Intel build. Arm32 JDK16 testing to complete. Alpine musl JDK16 is being built due to request.

- AIX is still waiting for a fix upstream and we will consider the right approach for delivery based upon when the fix arrives.
- Java 17 release
  - Checklist: [adoptium/adoptium#73](#)  
Platform Status: [adoptium/adoptium#74](#)
  - Noted that the AIX fix would not be part of the October release upstream due to code freeze, may need to carry a local patch until rolled into January update.
  - Lessons learned from compliance work on the earlier release should be raised next week in the retrospective, and assuming the resource is forthcoming the October release has no blockers.
  - Docker images out, and msi changes in place.
  - Question still outstanding about hosting the linux installers long term.
- [Changing default download](#) from Temurin 11 to Temurin 17.
  - PMC agreed that this should be landed.
  - API now advertises that Java 17 is the latest LTS.
- How to migrate AdoptOpenJDK.net users?
- API usage discussion.
  - Discussion of adoptopenjdk.net website and API migration to Adoptium.
  - Noted that the documentation needs updating to encourage migration.
- Source archive [download](#)
  - Should be easy for end users to get the source code used for each release.
  - [Linked PR](#) provided for information and discussion.
  - The PMC supported the idea of producing source bundles for this purpose. Discussion of whether to include the nightlies.
  - The source should also be available via the API. Noted that several builds may have the same src tarball. Only one set of sources required, as creating a source for every platform would overload the Jenkins server disk.
  - <https://github.com/adoptium/github-release-scripts>
- Lots of additional comments on shipping JREs - are we decided?
  - Seeing many comments about the lack of JRE provision.
  - Discussion of resource requirements for producing them.
  - Information about how to produce them from the JDK should be proactive on the website/video etc.
- Temurin Compliance July postmortem
  - Compliance group will be asking the Working Group to approach the Foundation to refine the manner in which the JCK is run.

**Meeting closed at 15:02 BST**
