

# Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

Date: 2021-December-08

## Agenda:

- Approval of minutes and review of [action items](#) from the previous meeting.
- Status of the AIX JCK testing
- Status of JREs
- Temurin project graduation review information
- Migrate JDK8u Mirror to Skara ([adoptium/temurin-build#2798](#))
- Alpine JDK8u backport [https://github.com/adoptium/jdk8u\\_skara/pull/4](https://github.com/adoptium/jdk8u_skara/pull/4)
- Linux Installer progress

## Action items:

Date	Description	Status
2021-06-30	ACTION: Hendrik to write a README for how to get to the Zenhub views of issues in the repos. for newcomers. Issue: <a href="https://github.com/adoptium/adoptium/issues/60">https://github.com/adoptium/adoptium/issues/60</a>	Closed
2021-10-20	ACTION: George to look at providing “obsoletes” RPM packages for publication to JFrog to replace adoptopenjdk	In progress: Checked for .deb
2021-11-10	ACTION: George to submit PR for updates to releasing documentation.	Done

2021-11-24	ACTION: Martijn to talk to the Eclipse infra team (Fred Gurr) about options for Adoptium build systems as a replacement for our main Jenkins system.	Completed
2021-12-01	ACTION: Martijn to speak to Eclipse about finding a new home for PMC documentation and meeting resources currently hosted outside project control.	Open

#### Attendees:

- ✓ George Adams
- ✗ Stewart Addison
- ✓ Hendrik Ebberts - Joined from 14:35
- ✓ Tim Ellison
- ✗ Severin Gehwolf
- ✓ Shelley Lambert
- ✓ John Oliver
- ✓ Martijn Verburg

#### Meeting called to order at 14:05 GMT

#### Minutes:

- **Approval of minutes and review of action items from the previous meeting.**
  - Minutes of the previous meeting were approved.
  - Hendrik's documentation issue is being tracked as part of the docs project
  - Other items were reviewed and updated.
- **Status of the AIX JCK testing**
  - No news on this topic.
- **Status of JREs**
  - Pipeline run for build and testing of historical JREs. Macs were missed, but have been completed now.
  - On plan to proceed to publish the binaries, blog to follow that to announce availability.
- **Temurin project graduation review information**
  - Thanks for comments to the doc, which has now been submitted to the EMO.
- **Migrate JDK8u Mirror to Skara ([adoptium/temurin-build#2798](https://github.com/adoptium/temurin-build#2798))**
  - Mirror has been setup at [https://github.com/adoptium/jdk8u\\_skara](https://github.com/adoptium/jdk8u_skara)
  - This will be faster and more robust than mirroring from the Hg repos.
  - Proposal to use this for the January release, so switch to it early and run tests and checks before the formal release.
  - Discussion about whether to make this a breaking change, by switching out the old repo for this new one compared to making it a parallel repo with a new name.
  - Noted that the aarch64 repository is still an Hg forest. Waiting for upstream to move this into a singular Github repo before changing.
- **Alpine JDK8u backport [https://github.com/adoptium/jdk8u\\_skara/pull/4](https://github.com/adoptium/jdk8u_skara/pull/4)**

- Some code patches required for support of the conditional compilation of these patches.
- TCK testing underway to help verify that these are complete.
- May not be ready for the scheduled January release, but no time pressure apparent at the moment.
- **Linux Installer progress**
  - packages.adoptium.net is now live for the new JFrog repo location of Temurin packages.
  - Meeting scheduled for this week to work through final gpg signing problems on the JFrog repo.
  - Once working as designed the repo will be rebuilt, and a blog entry will be written to explain how to install Temurin using this repo location.
  - Discussion of how to roll out the transition using 'obsoletes' directive and new URL information.
  - Reminder that the cacerts package is a separate release process at the moment, since the life cycle for them is different to the Temurin binaries themselves.
  - Documentation for installation can be hosted on the documentation service rather than the website directly.

**Meeting closed at 14:35 GMT**
