

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2021-December-22

Agenda:

- Approval of [minutes](#) and review of [action items](#) from the previous meeting.
- Update on reproducible build work with Andrew Leonard
- Info: last call for votes on [Temurin graduation thread](#).
- Installers
- JRE17 blog post / sharing

Action items:

Date	Description	Status
2021-12-01	ACTION: Martijn to speak to Eclipse about finding a new home for PMC documentation and meeting resources currently hosted outside project control.	Open
2021-12-15	ACTION: Stewart to request that Mikael pull the latest versions of JCK material from Oracle’s private site before the AIX tests are re-run.	Open
2021-12-15	ACTION: Tim to update the Eclipse wiki with Adoptium projects’ status on log4j vulnerability.	In progress
2021-12-15	ACTION: sxa to raise the question on jdk-updates-dev or jdk-dev to seek opinions and come back with a	Open

	recommendation for which GCC version should be used in Temurin builds.	
2021-12-22	ACTION: PMC to decide which versions of base Debian, RedHat (Fedora/CentOS) and SUSE linux distros to support for installers	Open

Attendees:

- ✗ George Adams
- ✓ Stewart Addison
- ✗ Hendrik Ebbers
- ✗ Tim Ellison
- ✓ Severin Gehwolf
- ✓ Shelley Lambert
- ✗ John Oliver
- ✓ Martijn Verburg
- ✓ Andrew Leonard - Guest

Meeting called to order at 14:15 GMT

Minutes:

- No quorum so can't approve previous minutes.
- Andrew Leonard gave a presentation on his work for reproducible builds.
 - ~10 patches, of which 6 have been submitted upstream that gets OpenJDK most of the way there (for Linux).
 - New CSR landed in Java 19 to allow setting a timestamp for Jars and jmods so you can reproduce those at a later time.
 - Bill Of Materials (BOM) discussed. Need a better definition of what makes up a build. We have the Metadata JSON today, but it's not detailed enough.
 - i. Cyclone DX is a tool to help create the BOM
 - CDS Archives are one of the more challenging items to make reproducible.
 - Andrew is looking for more help!
 - Martijn asked if there was an intent to backport to 17u. Andrew believed we should make the attempt.
 - i. Andrew will post a link to the upstream patches so others can investigate a possible backport
- We think all votes are in on the Temurin Incubation promotion thread.
- Martijn followed up with George on installer status, hoping to release that to the public before 2022
- Shelley raised that we don't have official guidance on which O/S versions we are supporting with our installers.
 - Currently we 'support': Debian, Suse and Redhat
 - We will need to properly define which versions of CentOS, Fedora, Ubuntu etc we truly support (That is, we install the binary on a test host and it passes smoke tests).

- i. Martijn made the early suggestion that we support O/S's that themselves are not EOL.
 - ii. Shelley suggested the leanest set possible.
- Blog post was approved and submitted. Stewart will close the issue and post in Slack when the post goes public. A saga ends :-).
