

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2022-Oct-12

Agenda:

- Approval of [minutes](#) from September 14th meeting.
- Approval of [statement](#) from September 21th meeting.
- Approval of [statement](#) from September 28th meeting.
- Approval of [statement](#) from October 5th meeting.
- Review of [action items](#) from the previous meeting.
- Java 19+36 release status
 - Release checklist ([adoptium#171](#))
 - Platform status ([adoptium#170](#))
- Requirements to add Linux RISC-V releases
- FAQ: CVEs in docker base OS images ([adoptium/containers](#))
 - See also [containers#183](#)
- Selection of release champion for October PSU release
- Archive documentation server repositories
- Move of Alpine 8u build to separate tree. Status?
- AoB

Action items:

Date	Description	Status
------	-------------	--------

2022-03-09	ACTION: George will document how the Alpine Linux JDK8u release was built and the limitations of the current build system that required this approach.	Open
2022-07-06	ACTION: Stephanie to investigate the difference in ECC algorithms available in the Alpine MUSL 8u build (temurin-build#3002)	In progress
2022-07-20	ACTION: George to keep the PMC informed of progress on the repository-settings-as-code work with EF infra. https://gitlab.eclipse.org/eclipsefdn/helpdesk/-/issues/1531	In progress
2022-09-07	ACTION: Shelley to raise issue to discuss potential automation of linking JBS and Adoptium support issues	Completed adoptium/176

Attendees:

- ☐ George Adams
- ☒ Stewart Addison
- ☐ Hendrik Ebbers
- ☒ Tim Ellison
- ☒ Severin Gehwolf
- ☒ Shelley Lambert
- ☒ John Oliver
- ☐ San Hong Li
- ☒ Martijn Verburg
- ☒ Lan Xia

Meeting called to order at 14:03 BST

Minutes:

- Approval of [minutes](#) from September 14th meeting.
- Approval of [statement](#) from September 21th meeting.
- Approval of [statement](#) from September 28th meeting.
- Approval of [statement](#) from October 5th meeting.
 - Minutes and statements were reviewed and approved.
- Review of [action items](#) from the previous meeting.
 - Actions of previous meetings were reviewed and updated.
- Java 19+36 release status
 - Release checklist ([adoptium#171](#))
 - Platform status ([adoptium#170](#))
 - i. Java 19 release of Temurin is now completed.
 - ii. The PMC thanked everyone for their work on achieving this new feature release.
- Requirements to add Linux RISC-V releases.

- Noted that RISC-V support in OpenJDK is from [JDK 19 onwards](#)
 - i. Suggested that support may be in JDK17, but in a non-main stream branch.
 - ii. We would only be building and releasing if it were a maintained platform in OpenJDK. We'd need to check with upstream.
- RISC-V has been removed from pipelines at the moment. To bring them back would require at least:
 - i. two build machines (potential for cross compilation), four or five test machines due to speed of these machines, and a further two EF-owned machines for compliance testing (depending upon how quickly this platform would need to be available after an upstream release).
 - ii. Additional test engineers would also be required to triage bugs and run compliance tests. This is not currently containable in existing engineering effort available at the project.
- FAQ: CVEs in docker base OS images ([adoptium/containers](#))
 - See also [containers#183](#)
 - Consider adding to the containers issue template.
 - This continues to be scanned by Dockerhub and updates managed by them.
- Selection of release champion for October PSU release
 - Wen Zhou has volunteered to be the release champion for this release.
 - Noted that Outreachy students will be active during the release week and frozen repository timescale. There won't be any concessions for this but expect a backlog of PRs to build up during the frozen period.
- Eclipse foundation is sponsoring a student from Outreachy, so we are continuing to evaluate and assist candidates.
 - Some adjustments made to "good first issues" tagged items to reflect the capabilities of Outreachy.
 - More good first issues are always welcomed.
- Archive documentation server repositories
 - Documentation and Documentation Server repositories have been obsoleted by website-v2.
 - Need to review docs that are in the Documentation* repos and move into website-v2 before archiving them.
 - i. For example, is this anywhere on the website? <https://github.com/adoptium/documentation/blob/main/documentation-documentation/eca-sign-off.adoc> we use it all the time for new contributors (I guess it is: <https://adoptium.net/docs/eca-sign-off>)
 - ii. <https://github.com/adoptium/documentation-services> and <https://github.com/adoptium/documentation> are both archived, but the "good first issues" still show up from the listing provided on the website at
 - ACTION: Tim to review what can be taken over from Documentation repos to website-v2 and then arrange for them to be archived.
- Move of Alpine 8u build to separate tree. Status?
 - Expectation is that this should be removed from the main stream in the Adoptium repo.

- Martijn noted that upstream merging is stalled, and Adoptium would benefit from having a clean copy with a separate branch for Alpine 8u.
 - ACTION: George and Stephanie will be assigned an issue (by Martijn) to refactor the 8u repository to move Alpine support out of main and into a separate branch/repo.
- AoB
 - Lan noted that the TRSS service is currently down. Issue to be raised with Adoptium Infra to ask it be restarted.
 - Discussion of onboarding new organizations into the project. It was noted that we don't always do a good job of assigning an experienced committer to work with new participants.
 - Sxa asked if there was any interest in the PMC about introducing Alpine ARM64. Non was expressed.

Meeting closed at 14:45 BST
