

Adoptium

Project Management Committee

Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2022-Aug-24

Agenda:

- Approval of minutes from August 17th meeting.
- Review of [action items](#) from the previous meeting.
- July 2022 PSU release status
 - Release status per platform ([adoptium#153](#))
 - Release checklist ([adoptium#152](#))
 - General retrospective ([adoptium#155](#))
 - Release notes needed ([website-v2#103](#))
- Release respin updates
 - 8u345 ([JDK-8194154](#))
 - 11.0.16, 17.0.4, 18.0.2 regression ([JDK-8292260](#))
- JDK18 respin?
- Temurin-Compliance onboarding difficulties
- Update on TRSS DomPurify vulnerability ([bugzilla#580566](#))
- GH Action repos (install-jdk, build-jdk and run-aqa)
 - Landing or closing long-standing PRs. ([slack](#))
- UBI container support request ([containers#259](#))
- Use of tivy et al for docker container scanning ([slack](#))
- Marketing material feedback to WG marketing committee

Action items:

Date	Description	Status
2022-03-09	ACTION: George will document how the Alpine Linux JDK8u release was built and the limitations of the current build system that required this approach.	Open
2022-07-06	ACTION: Stephanie to investigate the difference in ECC algorithms available in the Alpine MUSL 8u build (temurin-build#3002)	In progress
2022-07-06	ACTION: Sxa to review the process to allow AdoptOpenJDK secrets repository to come into Adoptium as a private repo. (infra#2661)	In progress
2022-07-20	ACTION: George to keep the PMC informed of progress on the repository-settings-as-code work with EF infra. https://gitlab.eclipse.org/eclipsefdn/helpdesk/-/issues/1531	In progress

Attendees:

- ☒ George Adams from 14:07 GMT
- ☒ Stewart Addison
- ☐ Hendrik Ebberts
- ☒ Tim Ellison
- ☒ Severin Gehwolf
- ☒ Shelley Lambert
- ☐ John Oliver
- ☒ San Hong Li
- ☐ Martijn Verburg
- ☒ Lan Xia

Meeting called to order at 14:04 BST**Minutes:**

- Approval of minutes from August 17th meeting.
 - Minutes of the previous meeting were approved.
- Review of [action items](#) from the previous meeting.
 - AdoptOpenJDK secrets moving to Adoptium was discussed. EF use a different tool for such things. Sxa will continue to action this item.
 - Now the releases are complete, Sxa will revisit the configuration of repositories as described in the spreadsheets created before the release.
 - Adding additional review requirements is not expected to have an impact on bots.
- July 2022 PSU release status

- Release status per platform ([adoptium#153](#))
 - Release checklist ([adoptium#152](#))
 - General retrospective ([adoptium#155](#))
 - Release notes needed ([website-v2#103](#))
- Release respin updates
 - 8u345 ([JDK-8194154](#))
 - 11.0.16, 17.0.4, 18.0.2 regression ([JDK-8292260](#))
 - All respins for 8, 11, and 17 complete and are pushed to Github, just need to push packages to JFrog and other repositories.
 - New tag in repos for 18 upstream so plan to respin on that too.
- Temurin-Compliance onboarding difficulties
 - Had been some confusion with communications, but everyone has Github access now. Some infra access is still required by a subset of members.
 - Resulted in regular infrastructure sync with EF to review outstanding open issues and priorities, check updates to TCK material available, etc.
 - No further PMC tracking requested.
- Update on TRSS DomPurify vulnerability ([bugzilla#580566](#))
 - End point is disabled to resolve vulnerability, and while it would be desirable to reintroduce it this is not a priority for the project.
- GH Action repos (install-jdk, build-jdk and run-aqa)
 - Landing or closing long-standing PRs. ([slack](#))
 - Some are dependency updates, but in general it is unknown if changes here will affect the binaries.
 - Noted that only build-jdk and run-aqa made it to Adoptium, the install-jdk is replaced by setup-java general action - although that does not have all the functionality that was used by install-jdk. Consider discussion with the Github actions team.
 - Flag for Sophia to review and check on nightlies since there is no substantive pre-merge testing.
 - Suggestion to add such tests to help with reassurance of new PRs.
 - Noted that run-aqa is a published action in the Github marketplace, so it should have more formal release checking in place and a release schedule.
- UBI container support request ([containers#259](#))
 - Another example of expanding the base OS images for Temurin.
 - Clarified that UBI is also available from Docker Hub and not just the Red Hat registry.
 - If there is a UBI image then likely would want to deprecate the CentOS to avoid spread. Also need to know the release cadence of UBI etc.
 - Propose to advise the raiser that this is not in scope for Adoptium while it is outside the official images base OS set. Point raiser to the relevant links.
 - Noted that there will be a revisit of this when CentOS 7 goes end of life.
- Use of tivy et al for docker container scanning ([slack](#))
 - PR has been raised for using this tool for container scanning and security.
 - Question whether this is the recommended tool, or if there are others that we should consider.
 - PMC supports the idea of scanning containers to check - and maybe better to raise it as an upstream action in the official images building.

- Previous experience with such tools have resulted in a resource sink to track down CVEs to see if they have got fixes in packages used in the images.
- Would like to have a planned approach to addressing the security of the containers, and select the appropriate tools to suit the objectives.
- Would be good to get the input of some companies operating in this area such as Synk
- ACTION: George will have discussion with upstream official container image folks to understand what is being done already for vulnerability scanning.
- Marketing material feedback to WG marketing committee
 - [Brochure](#)
 - [spreadsheet](#)

Meeting closed at 14:50 BST
