

# Adoptium

## Project Management Committee

### Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

Date: 2021-June-09

#### Agenda:

1. Approval of [minutes](#) and review of [action items](#) from the previous meeting.
2. Milestone 1 build status from [project board](#).
3. JCK testing status.
4. Can we re-enable nightly builds publishing now?
5. Migrate ci.adoptopenjdk.net -> ci.adoptium.net
6. First Temurin release status (July 20th outlook)
7. Bots for TRSS - where are they documented and who can deploy the controls ([infrastructure/2195](#) is blocking daily work at the project including triage of Temurin)
8. SSL certificate for TRSSML - should it be at adoptium or adoptopenjdk?NTP?
9. “Ask Us Anything” for DevOxxUK - <https://devoxuk21.cfp.dev/> and EclipseCon Community Days (WG agenda?)
10. PMC attendance at community calls + Division of labour / covering gaps

#### Action items:

Date	Description	Status
2021-05-12	ACTION: George and Sxa will sync up with Andreas to get a hand-over of Nine colo status	In progress
2021-05-12	ACTION: Tim to create an issue to capture the plan for Docker migration	Pending
2021-06-02	ACTION: George and Sxa to agree on config of Ampere machine, including networking configuration to the supplier before it is shipped to Nine colo.	Pending

2021-06-02	ACTION: Sxa to discuss with EF infra's Mikael about the machines for running TCK supporting services (kerberos etc)	In progress
------------	---	-------------

#### Attendees:

- ✓ George Adams
- ✓ Stewart Addison
- ✗ Hendrik Ebbers
- ✓ Tim Ellison
- ✓ Severin Gehwolf - from 14:52
- ✓ Shelley Lambert
- ✓ John Oliver
- ✓ Martijn Verburg - from 14:14 BST

#### Meeting called to order at 14:03 BST

#### Minutes:

##### Approval of [minutes](#) and review of [action items](#) from the previous meeting.

- Minutes were agreed to be a true record of the meeting.
- Action items were reviewed and updated.
- Request to track the creation of the TCK support machines via an issue.
- SXA noted that IBM is removing access to current AIX machines, and is talking to contact there to get replacements.
- ACTION: sxa to ensure sufficient AIX machine coverage is in place going forward.

##### Milestone 1 build status from [project board](#).

- No blockers. Discussion of the behavior expected from the API.

##### JCK testing status.

- EF infra (Mikaël Barbero) has downloaded and unzipped the JCK materials into private repos.
- Require bots to clone these and make them available to test pipelines. Mikaël is now on vacation until Monday June 14 so no progress expected until then.
- Still waiting on machines to be set up to run the tests.
  - Progress documented in <https://github.com/adoptium/adoptium/issues/3>
  - Providing help to EF infra with running Ansible scripts
  - Does Eclipse require commit access to perform their work? Check suitable for that with EF.
  - Consider working with Denis to make progress.
  - Shelley will update the issue to show status of individual platforms. Include dynamic provisioning.

##### Can we re-enable nightly builds publishing now?

- Gdams raised this question.
- Scripts are in place to only publish the Temurin builds. Non-Temurin's will not be published.
- Having builds available will assist with testing the API and AQA vit code too.
- Add markdown language to indicate these are BETA builds as per obligation.

- DECISION: Re-enable the nightly build and test on that basis.

#### **Migrate ci.adoptopenjdk.net -> ci.adoptium.net**

- Request to create a CNAME to point the ci.adoptium.net name to the current server.
- Will require Jenkins config update etc. to clean-up the older jobs and reflect the new names.
- Sxa concerns about the status of the current server being suitable for use as ci.adoptium, would prefer to have a new server stood up and recreate required jobs.
- Discussion of whether to run on Eclipse's Jenkins as a Service, or run our own server.
  - May require low-level control of Jenkins that would be unavailable at the EF.
  - Various pros and cons were discussed.
  - Shelley shared the example from the Temurin Compliance project site.
  - Infra folks to discuss offline and come back with recommendations
- Move the discussion onto the infrastructure Slack channel and come back with decision.

#### **First Temurin release status (July 20th outlook)**

- Reset Milestone One to mean "produce binaries that are AQA release quality tested and in the pipeline for JCK, ready to go".
  - Enable nightlies immediately, and then run the release pipelines on Monday (April source code tags). Triage early next week.
  - Mac, Windows, and Linux x86\_64 only
- Define Milestone Two to be a JCK'd release of the April code tag
  - Need to ensure EF are aware that the JCK machines controlled by the Foundation have committer login rights to allow for manual testing.
- Given July release is during vacation time, need to start identifying release champions etc.
- ACTION: George to enable nightly publishing
- ACTION: George to trigger release pipelines on Monday 14th June

#### **Bots for TRSS - where are they documented and who can deploy the controls**

**([infrastructure/2195](#) is blocking daily work at the project including triage of Temurin)**

- Relates to milestone task. This is a blocker.
- Secrets repo has a list of the bots that are currently available.
- Need to ensure that a bot has access to the builds and share the (read-only) token to the TRSS server so builds can be read.
- ACTION: George to share eclipse-temurin-bot token to allow TRSS access.

#### **SSL certificate for TRSSML - should it be at adoptium or adoptopenjdk?NTP?**

- Discussion of association of SSL certificate with AdoptOpenJDK or Adoptium naming.
- Discussion of ability to use multiple host names via CloudFlare.
- DECISION: have it associated with trssml.adoptium.net, and also move trss.adoptium.net to ensure consistency
- ACTION: Sxa to ping Eclipse webmaster to action DNS change for trss.adoptium.net and trssml.adoptium.net

#### **"Ask Us Anything" for DevOxxUK - <https://devoxuk21.cfp.dev/> and EclipseCon**

#### **Community Days (WG agenda?)**

- About a week left to get the proposal in. Steve Poole eager to get it in.
- Aim to get a few names in. Work with Steve to get it in.

#### **PMC attendance at community calls + Division of labour / covering gaps**

- Discussion of engagement in community calls by leaders. Calls are recorded and have an agenda.
- How does the PMC document the areas of the project that need focus, and identify gaps that are uncovered (Docker being the main example).
- Martijn asking that the calls be scheduled via Doodle to ensure people can participate.
- Bring over the “de facto” list of go-to people for project areas, and update it for Adoptium.
- Calls are listed on the shared calendar.

**Meeting closed at 15:02 BST**
