

# Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

**Date:** 2022-May-25

## Agenda:

- Approval of minutes from May 18 meeting.
- Review of [action items](#) from the previous meeting.
- Adoptium marketplace status
  - Work completed to date
  - Launch announcement & participants’ status
  - Temurin status (AQAvit results)
- Discussion of proposed potential change in release process
- AIX JDK17+
  - looking for consensus to float a patch so we can release when a patch becomes available
- Alpine aarch64 backdated releases

## Action items:

| Date       | Description                                                                                                                                            | Status |
|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| 2022-03-09 | ACTION: George will document how the Alpine Linux JDK8u release was built and the limitations of the current build system that required this approach. | Open   |

|            |                                                                                                                                                                                                                        |      |
|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| 2022-04-13 | ACTION: George to confirm that repo settings have been reviewed and set appropriately, and that admin rights are relinquished (or shared) accordingly.<br><a href="#">Define per-repository configuration settings</a> | Open |
| 2022-05-18 | ACTION: George will attempt to get stats from JFrog on the number of people pulling from old/EOL distribution versions.                                                                                                | Open |
| 2022-05-18 | ACTION: Sxa to hold a meeting to go through the required and actual access controls on repositories and key systems, and stored credentials.                                                                           | Open |

### Attendees:

- ☒ George Adams
- ☒ Stewart Addison
- ☐ Hendrik Ebbers
- ☒ Tim Ellison
- ☒ Severin Gehwolf
- ☐ Shelley Lambert (apologies)
- ☒ John Oliver
- ☒ San Hong Li
- ☐ Martijn Verburg
- ☒ Lan Xia

### Meeting called to order at 14:02 BST

### Minutes:

- Approval of minutes from May 18 meeting.
  - Minutes of the previous meeting were reviewed and approved.
- Review of [action items](#) from the previous meeting.
  - George has access to the total download numbers from JFrog. Older Java versions tend towards older OS versions.
  - Unable to determine how these change in time, so we can't see recent trends. No plan to change decision to stop pushing new Java builds on very old OS versions.
  - Notes that the JFrog system allows for CDN distribution. Should we enable this for our packages? Plan to do so via an infra issue.
  - Change to Docker image version of Ubuntu is ready to go.
- Adoptium marketplace status
  - Work completed to date

- Temurin data is available for a broad range of platforms. Huawei has java 8 data available, Red Hat data is also available, IBM presenting data with debug images which should be updated before ready.
  - Data is on staging, Temurin is the only one live.
  - The website is staging.
- Launch announcement & participants' status
  - The launch is a go ahead for tomorrow, and briefings are taking place in support of this.
- Temurin status (AQAvit results)
  - Temurin's test results are still coming in for the secondary platforms. Discussion of enabling these builds and expect the results to come imminently.
- AIX JDK17+
  - looking for consensus to release when a patch becomes available ahead of it being integrated upstream.
  - Testcase failure means that there has been no AIX release for some time, and the upstream fix is being worked on at the moment. Unknown ETA.
  - Discussion of whether Adoptium should pick up the patch from head and backport to earlier releases to allow for the AIX releases to continue.
  - Unknown about the size of the potential patch.
  - The PMC has no objection to build the patch early provided we see a clear intent for upstream to land this patch in the near future.
- Alpine aarch64 backdated releases
  - Work is finishing off of the Alpine aarch64 work across multiple Java versions, should Adoptium build the GA tag, pass the AQAvit and TCK tests and push it out?
  - Come back and review next week based on experience of the test results before putting through the release pipeline.
- Discussion of proposed potential change in release process
  - Continued discussion about how to handle future release process options.

**Meeting closed at 15:01 BST**
