

# Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

Date: 2021-December-01

## Agenda:

- Approval of minutes and review of [action items](#) from the previous meeting.
- Status of the October PSU release.
  - Checklist [adoptium/adoptium#83](#)
  - Platform status [adoptium/adoptium#81](#)
- Status of JREs
- Alibaba proposals for CI & AQAvit contributions
- ci.adoptopenjdk.net upgrade plan
- Linux installer progress
- [JFrog repository](#) progress
- Add remote trigger from public Jenkins server to private Jenkins server.
- [Temurin project graduation review](#) document
- New committer discussion

## Action items:

Date	Description	Status
2021-06-30	ACTION: Hendrik to write a README for how to get to the Zenhub views of issues in the repos. for newcomers. Issue: <a href="https://github.com/adoptium/adoptium/issues/60">https://github.com/adoptium/adoptium/issues/60</a>	Open

2021-10-20	ACTION: George to look at providing “obsoletes” RPM packages for publication to JFrog to replace adoptopenjdk	In progress: Checked for .deb
2021-11-10	ACTION: George to submit PR for updates to releasing documentation.	Open
2021-11-24	ACTION: Martijn to talk to the Eclipse infra team (Fred Gurr) about options for Adoptium build systems as a replacement for our main Jenkins system.	Open

#### Attendees:

- ✓ George Adams
- ✓ Stewart Addison
- ✓ Hendrik Ebberts
- ✓ Tim Ellison
- ✓ Severin Gehwolf
- ✓ Shelley Lambert
- ✗ John Oliver
- ✓ Martijn Verburg

#### Meeting called to order at 14:03 GMT

#### Minutes:

- Approval of minutes and review of [action items](#) from the previous meeting.
  - Minutes of the Nov 24 meeting were reviewed and approved.
  - Actions from the previous meeting were reviewed.
- Status of the October PSU release.
  - Checklist [adoptium/adoptium#83](#)
  - Platform status [adoptium/adoptium#81](#)
  - Close out the October release. Convert this into status of the AIX exclusion result.
- Status of JREs
  - Releasing the JREs will be tracked as a mini-release.
  - Sxa will be release champion, with help from Martijn/Shelley/George to produce and test the binaries.
- Alibaba proposals for CI & AQAvit contributions
  - Meeting was held earlier in the week with Shelley and Tim, where Joey and Sanhong described their plans for further contributions to the AQAvit project.
  - Joey volunteered to be a further mentor on the Outreachy projects.
  - There was a discussion about the scope of performance testing - limited to regression testing per vendor and not a league table.
  - Alibaba will contribute some additional integration and system testing scenarios.
- ci.adoptopenjdk.net upgrade plan

- No progress on this topic this week.
- Linux installer progress
  - Progressing well. Multi-arch Debian is looking good, and uploading automation completed.
  - Licence file not being appended to Debian files, investigation is underway. Sophia is also looking into this.
  - Ticket open with JFrog around the automated gpg signing is still open.
  - Bugzilla is open for the acquisition of an SSL certification for the packages.adoptium.net domain.
- [JFrog repository](#) progress
  - Already covered above.
- Add remote trigger from public Jenkins server to private Jenkins server.
  - Open item being discussed in the community call.
  - For awareness that the build Jenkins is triggering a pipeline in the compliance project. Need to check that Eclipse Infra are aware of and support the mechanism that has been adopted here.
- [Temurin project graduation review](#) document
  - Informational. Request the PMC to review the document before it is submitted to the EMO.
- New committer discussion
  - Since there is no mechanism for Temurin Compliance contributors to gain access after signing the agreement without being a committer.
  - The committer election tools do not recognise the special circumstances for Temurin Compliance, so it will remain a non-standard process indefinitely.
  - This has been updated on the documentation site for the project.
- AoB
  - Hendrik agreed that the documentation task can be covered by a Github issue, and need not be a PMC action. -> <https://github.com/adoptium/documentation/issues/39>
  - Severin asking if the MUSL backports are being shared upstream yet? Martijn explained that they are not yet ready for upstreaming as they are in open development.
  - Shelley suggested that the PMC hear about the reproducible builds in the next meeting.
  - ACTION: Martijn to speak to Eclipse about finding a new home for PMC documentation and meeting resources currently hosted outside project control.

**Meeting closed at 14:39 GMT**
