Meeting called to order at 14:01 BST

Minutes:

- Approval of [minutes](#) from April 26th meeting.
 - Minutes of the meeting were approved.
- Review of [action items](#) from previous meetings.
 - No updates to report.
- Review of [GitHub issues flagged for PMC agenda](#).
 - Support the use system cacerts as an option ([containers#293](#))
 - i. Proposal is to support the merging of system cacerts with JDK cacerts iff an environment variable is set.
 - ii. Would be for Debian-based distributions, akin to the OpenJDK image method using a hook in such packaging.
 - iii. RPM-based distros would be similar, but without the same hook it would require an entry point in the image to allow users to provoke the update.
 - iv. Would not change the default behavior of the image.
 - v. This would be part of the runtime invocation at runtime to perform the merge.
 - DECISION: The PMC would accept such a patch.
- April CPU release update
 - Completing last parts, and doing a retrospective.
 - Problems pushing to JFrog artifactory, and problems raising an issue with them causing delay to getting the packages out.
 - Dockerhub images for ARM32 being pushed to the hub.
 - Retrospective in play, and scorecards updated.

- OpenJDK Dev Support [proposal](#)
 - This was pitched to the WG for demand on project resources last week, and was accepted for progression.
 - Shelley shared the concept and some details with the PMC.

- PMC in support and discussed ways to roll this out across WG OpenJDK members' developers.
- AoB
 - None
