

# Adoptium

## Project Management Committee

### Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

Date: 2021-May-19

#### **Agenda:**

1. Approval of minutes and review of actions items from previous meeting
2. First Eclipse Temurin release
  - a. Walkthrough of [Milestone 1 status](#)
  - b. TCK access status
  - c. Plan “B”
3. AQAvit certification process discussion
4. Items to raise with the working group
  - a. Incl. DEVOXX UK sponsorship

#### **Action items carried forward:**

- 2021-05-12 ACTION: Tim to publish minutes of 5th May. - Complete
- 2021-05-12 ACTION: Stewart to open a ticket with the EF to create JCK machines for Milestone 1, Win/Lin/Mac machines. - Complete (issues 573538 and 573589)
- 2021-05-12 ACTION: George and Sxa will sync up with Andreas to get a hand-over of Cloud9 status - Carry forward
- 2021-05-12 ACTION: Tim to create an issue to capture the plan for Docker migration - Carry forward

#### **Attendees:**

- George Adams (Microsoft) - left for 10 mins at 14:30
- Tim Ellison (Red Hat)
- Martijn Verburg (Microsoft)
- John Oliver (Microsoft)
- Stewart Addison (Red Hat)
- Hendrik Ebberts (Karakun)
- Severin Gehwolf (Red Hat)

## Minutes:

- Minutes of the previous meeting were accepted as a true record.
  - Action list updated.
- All PMC members are to update the Adoptium repo with new issues covering any EF requirements for the Incubator release.
- Code Signing for 8u is underway, thoughts about 11u imply it will be much more complicated.
  - Reach out to EF to seek alternatives for code signing service. Already aware that Adoptium is unable to have control of an org code signing certificate.
- Build scripts directory was locked down to limit access to builds not destined for release, but has seen to be open again giving access to the OpenJ9 builds. Need to revisit and check that this can be done securely.
  - Will reapply controls on Jenkins views and ensure that the changes are not reverted on job recreation.
- Standing up Adoptium APIs underway. Need questions about costs raised with the Working Group for running on Azure credits.
  - ACTION: Martijn to ask WG to spend on Azure credits for running the API app. Currently are using these credits while staging the API work, proposal to move to production at same rate.
- Still waiting for access to the TCK. EF are working on various issues that are blocking access.
  - PMC discussed options around the July release if there is no access to the JCK, including pausing work, and contributors focusing back on the AdoptOpenJDK project temporarily, continuing with the Temurin builds but not releasing the developer builds in July.
  - PMC will consider options and potentially meet ahead of the next planned meeting to replan the release.
- AQA vit certification steps are being defined. Shelley is defining the steps required to demonstrate quality has been achieved, and Tim is defining the implications for the trademarks, marketing, and statements etc.
- Items to raise with the WG: the DEVOXX item is not on the agenda for tomorrow, will add it for next week's meeting.

END
