

# Adoptium

## Project Management Committee

### Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

Date: 2021-August-11

#### Agenda:

- Approval of minutes and review of [action items](#) from the previous meeting.
- July PSU Release status from [Zenhub board](#).
- Docker Hub/Homebrew update - George
- Hosting for RPM/DEB
- Review platforms we release,  
<https://github.com/adoptium/adoptium/issues/3#issuecomment-866903922>

#### Action items:

Date	Description	Status
2021-06-30	ACTION: Shelley to write a README for how to get to the Zenhub views of issues in the repos. for newcomers. Issue: <a href="https://github.com/adoptium/adoptium/issues/60">https://github.com/adoptium/adoptium/issues/60</a>	Open
2021-08-04	ACTION: Martijn to kick-off a LinuxNew installer meeting to discuss the way forward.	Closed

#### Attendees:

- ✓ George Adams
- ✓ Stewart Addison
- ✗ Hendrik Ebberts

- ✓ Tim Ellison
- ✓ Severin Gehwolf
- ✓ Shelley Lambert
- ✓ John Oliver
- ✓ Martijn Verburg

## Meeting called to order at 14:03 BST

### Minutes:

- **Approval of minutes and review of [action items](#) from the previous meeting.**
  - The minutes of the previous meeting were accepted as a true record.
  - Actions from the previous meeting were reviewed and updated.
- **July PSU Release status from [Zenhub board](#).**
  - Zenhub not up to date, will follow the release checklist progress.
  - Aarch64 and PPC64LE linuxes have been released
  - LoZ and AIX next on the list, with Solaris and Win32 to follow.
  - In parallel are doing TCK runs on Java 8 JRE for primary platforms, and follow up with later versions afterwards.
  - Noted that there is an issue with the MSI which will require a respin. Has been reported on Java 8, but we need need to verify scope.
    - <https://github.com/adoptium/installer/issues/329>
  - Additional help required on the temurin-compliance workload.
    - Adoptium issue #3 shows the impact of resources on timelines for a release.
  - Eclipse infra's absence still impacting the progress.
  - Some discussion of the correct time to hold retrospectives.
  - Expectation is that the canonical location for distribution of RPMs/DEBs is from Eclipse controlled property. Current suggestion is around using a Nexus repository. A request has been made to Eclipse for this.
    - [https://bugs.eclipse.org/bugs/show\\_bug.cgi?id=575312](https://bugs.eclipse.org/bugs/show_bug.cgi?id=575312)
  - Some discussion about the requirements for this repo host. No need to publish nightlies into this repo, which will reduce requirements.
- **Docker Hub/Homebrew update - George**
  - Docker is progressing on the set-up for an "Eclipse-Temurin" location.
  - Ubuntu-based images proposed already, and plan to follow-up with the CentOS versions.
  - Documentation for how to use these for alternative base OS image and jlink.
    - <https://github.com/docker-library/docs/pull/2008>
  - Automation in place for creating images in the release pipeline.
  - Alpine/MUSL is a target that we will look to add back in the future for Java 17 onwards. Consider headless runtime only.
    - ACTION: George to propose the target for Alpine and the way it is produced for Java 8 and Java 11 onwards.
    - Suggest to review the list of supported platforms and agree at the PMC level.

- ACTION: Tim to bring the proposed list of supported platforms to a future PMC meeting. Based upon the program plan.
- Current list is shown in the adoptium issue #3
  - <https://github.com/adoptium/adoptium/issues/3#issuecomment-866903922>
- **Hosting for RPM/DEB**
  - Discussed earlier in the meeting.
  - Homebrew has been approved and should appear shortly.
- **AoB**
  - Work required to support the marketplace includes the website, AQAvit verification procedures, and marketplace API. Would be worth exploring existing APIs that do similar work.
  - ACTION: Shelley to open an issue to capture the design of the marketplace API in the Adoptium repo.
  - Further discussion of the JRE provision across different Java versions.

**Meeting closed at 14:46 BST**
