

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2022-January-12

Agenda:

- Approval of minutes from January 05 meeting.
- Review of [action items](#) from the previous meeting.
- Chocolatey packages support discussion with Johan Janssen.
- Update on [Temurin incubator graduation review](#).
- AQAvit project progress review request.
- Linux support policy and statement.
- January CPU release status
 - Expected upstream source code GA is 2022-01-18
 - Planned Temurin CPU releases 17.0.2, 11.0.14, 8u322
 - Tracking issue [adoptium/adoptium#109](#)
- Discussion of Adoptium marketplace processes and API ([doc](#)).
- Question on alpine musl port work (in Slack).
- Discuss migrating from AdoptOpenJDK GSuite to Adoptium.
- Upcoming renewal of LastPass service
- [Bump docker images to Alpine 3.15](#)
- Default .github repo

Action items:

Date	Description	Status
2021-12-01	ACTION: Martijn to speak to Eclipse about finding a new home for PMC documentation and meeting resources currently hosted outside project control.	In progress
2021-12-15	ACTION: Stewart to request that Mikael pull the latest versions of JCK material from Oracle's private site before the AIX tests are re-run.	Completed
2021-12-15	ACTION: sxa to raise the question on jdk-updates-dev or jdk-dev to seek opinions and come back with a recommendation for which GCC version should be used in Temurin builds.	Completed
2021-12-22	ACTION: PMC to decide which versions of base Debian, RedHat (Fedora/CentOS) and SUSE linux distros to support for installers	In progress
2022-01-05	ACTION: Martijn to pull together a statement of direction for the project's Linux support	Open

Attendees:

- ✓ George Adams
- ✓ Stewart Addison
- ✗ Hendrik Ebberts
- ✓ Tim Ellison
- ✓ Severin Gehwolf
- ✓ Shelley Lambert
- ✗ John Oliver
- ✓ Martijn Verburg
- ✓ Johan Janssen (guest) (left at around 14:20 GMT)

Meeting called to order at 14:03 GMT**Minutes:**

- Approval of [minutes](#) from January 05 meeting.
 - Minutes of the previous meeting were approved.
- Review of [action items](#) from the previous meeting.
 - Actions were reviewed and updated.
 - A number of these are on the agenda for this meeting.
- Chocolatey packages support discussion with Johan Janssen.
 - Discussion arose as to how we deal with deprecated packages, including transition from AdoptOpenJDK to Adoptium.

- Options are: do nothing, show a warning when using obsolete packages, or delegate to installing a Temurin package instead.
- Installing a Temurin as a replacement of AdoptOpenJDK could potentially change expected keys and directory locations.
- Chocolatey cannot remove a package when it goes EOL. Unknown how this is handled for other packages.
- Installing Temurin into the AdoptOpenJDK location would be too confusing. Would prefer to just install in the usual location.
- Consider raising with the Chocolatey team as to how they would expect this to occur.
- Proposal to discuss with Chocolatey package manager group for expectations, and if no definitive answer to change manager to install Temurin in place of AdoptOpenJDK.
- Suggestion that the packaging code should be under the Adoptium TLP rather than Johan's personal Github space.
- Johan left the meeting at this point.
- Discussion of intent to notify the OpenJ9 leads to engage with him about how Chocolatey should handle in the future.
- Update on [Temurin incubator graduation review](#).
 - Temurin is now a mature project at Eclipse.
- AQAvit project progress review request.
 - EF have requested that a progress review is submitted.
 - AQAvit are planning to conduct a release which will align with such a review. Other review items are all well in hand.
- Discussion of Adoptium marketplace processes and API.
 - The referenced doc was reviewed and discussed.
 - Plan to set up a follow-up meeting to discuss API updates.
- [Bump docker images to Alpine 3.15](#)
 - Issue for providing Alpine 3.15 base image. Should 3.14 be kept or replaced?
 - Agreed that 3.15 will be the new version used.
- Linux support policy and statement.
 - Deferred until the next meeting.
- January CPU release status
 - Expected upstream source code GA is 2022-01-18
 - Planned Temurin CPU releases 17.0.2, 11.0.14, 8u322
 - Tracking issue [adoptium/adoptium#109](#)
 - No issues identified at this point.
- Question on alpine musl port work (in Slack).
 - Stephanie was checking on status. The testing is underway.
 - Stephanie is being added to Temurin-Compliance to help with visibility.
- Discuss migrating from AdoptOpenJDK GSuite to Adoptium.
 - EF does not have project-level support for GSuite usage.
 - No objection to the project managing their own, at cost to the WG budget.
 - Question about whether it can be obtained at zero cost, or if the existing suite can be downgraded to the free level.
 - Martijn to continue assessing.
- Upcoming renewal of LastPass service

- LastPass renewal is due in the next few months. Proposal to move to BitWarden as a no-cost alternative.
 - No objection.
- Default .github repo
 - Github functionality to include standard information and design to the organization and repos. Would be a good opportunity to improve Adoptium marketing presence and uniformity.
 - No objection from the PMC to creating it.

Meeting closed at 15:00 GMT
