

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2022-July-27

Agenda:

- Approval of minutes from July 20th meeting.
- Review of [action items](#) from the previous meeting.
- July 2022 PSU release status
 - Release status per platform ([adoptium#153](#))
 - Release checklist ([adoptium#152](#))
 - General retrospective ([adoptium#155](#))
 - Release notes needed ([website-v2#103](#))
 - Team availability / distribution of workload
 - Goals (2 days from tag for primaries, 7 days from tag for majority of secondaries, publish complete 10 days from tag). ([adoptium#157](#))
- Temurin Win64 respin due to missing DLLs ([slack thread](#))
- Potential for jdk8u upstream revert requiring respin ([mailing list thread](#))
- Temurin-Compliance update

Action items:

Date	Description	Status
2022-03-09	ACTION: George will document how the Alpine Linux JDK8u release was built and the limitations of the current build system that required this approach.	Open

2022-07-06	ACTION: Mission Control PMC to contribute to the project progress review requested by the EMO	In progress
2022-07-06	ACTION: Stephanie to investigate the difference in ECC algorithms available in the Alpine MUSL 8u build (temurin-build#3002)	In progress
2022-07-06	ACTION: Sxa to review the process to allow AdoptOpenJDK secrets repository to come into Adoptium as a private repo. (infra#2661)	In progress
2022-07-20	ACTION: Martijn to create a new installer issue to explore the options and strategy going forward for publishing the same RPM under different distro paths in the packages.adoptium.net repo. https://github.com/adoptium/installer/issues/501	In progress
2022-07-20	ACTION: George to keep the PMC informed of progress on the repository-settings-as-code work with EF infra. https://gitlab.eclipse.org/eclipsefdn/helpdesk/-/issues/1531	In progress

Attendees:

- ☒ George Adams
- ☒ Stewart Addison
- ☐ Hendrik Ebbers
- ☒ Tim Ellison
- ☐ Severin Gehwolf
- ☒ Shelley Lambert
- ☐ John Oliver
- ☐ San Hong Li
- ☐ Martijn Verburg
- ☒ Lan Xia

Meeting called to order at 14:04 BST

Minutes:

- Approval of minutes from July 20th meeting.
 - Minutes of the previous meeting were approved.
- Review of [action items](#) from the previous meeting.
 - Actions were reviewed and updated.
- July 2022 PSU release status
 - Release status per platform ([adoptium#153](#))
 - Release checklist ([adoptium#152](#))
 - General retrospective ([adoptium#155](#))

- Release notes needed ([website-v2#103](#))
- Team availability / distribution of workload
- Goals (2 days from tag for primaries, 7 days from tag for majority of secondaries, publish complete 10 days from tag). ([adoptium#157](#))
- Issues outstanding with AIX 7.2 machine set-up. There is a hot fix for AIX 17.
- Some password resets by EF infra required for compliance team members led to a short delay.
- The release status per platform issue is up to date and the best place to keep up with information.
- Operational issues apparent when running the JCKs on MacOS machines.
- Discussion of people assignments to further Mac releases. Need to balance availability of people with priority platforms. George will address Mac release tasks following this meeting.
- Agreement that post review of resource allocation, and machine availability will be discussed in the retrospective.
- PMC encouraged to review the draft blog entry for release notification.
 - i. <https://github.com/adoptium/blog.adoptium.net/pull/171>
- Discussion of capturing the fixed issues in machine readable format
- Temurin Win64 respin due to missing DLLs ([slack thread](#))
 - Change to vs2019 level resulted in runtime DLLS missing in the installer.
 - Testing underway with revert Win64 to vs2013 and reship.
 - i. This was updated to vs2017 to ensure builds could be recreated.
 - Other option is to add in the missing DLLs. This may uncover further problems.
 - Discussion of ensuring we have test environments that better reflect the expected end-user environment. Add a smoke test that only uses the basic Docker environment to ensure testing does not depend upon the development-time environment.
- Potential for jdk8u upstream revert requiring respin ([mailing list thread](#))
 - Follow direction of the upstream as to whether there will be a new GA tag for this release.

Meeting closed at 14:40 BST
