Meeting called to order at 14:02 BST

Minutes:
- Approval of minutes from July 13th meeting.
  - The minutes were approved.
  - Noted that we can symlink between directories in the packages directories.
- Review of action items from the previous meeting.
  - Actions were reviewed and updated.
  - George will check with Mission Control PMC on their progress review.
- July 2022 PSU release status
  - Release status per platform (adoptium#153)

- - Release checklist ([adoptium#152](#))
    - General retrospective ([adoptium#155](#))
    - Version priority: 17, 11, 8, 18 (or first tagged)
    - Temurin-compliance committer availability
    - Availability for people to run tests was discussed. Short delay as project permissions are resolved by the Eclipse infrastructure team for access to new members.
    - People are being assigned to platforms for compliance testing.
    - VS2019 update causing issues on JDK11u builds. Exploring backing out the update back to VS2017 - tests currently running.
    - Andrew is looking at the merge conflicts of 18, these are expected to be resolved shortly.
- Creating an SBOM by default, or not ([temurin-build#3053](#))
    - Agreed not to create it by default for all users, Adoptium will create them each time by configuring correctly and having CycloneDX as a prereq. This is not going to be useful to most users of the build script.
- AoB
    - Will reach out to check on Hendrik.
