Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2023-Mar-01

Agenda:
- Approval of minutes from February 22nd meeting.
- Review of action items from previous meetings.
- Temurin v20 release
  - OpenJDK tag expected 21 Mar 2023. Possibly b35.
  - Release champion: TBD
  - Release checklist (adoptium/adoptium#TBD)
  - Release status per platform (adoptium/adoptium#TBD)
- Temurin RPM version naming convention.
  - See Slack thread started by Scott (slack thread), with follow-up arguments by Andreas.
  - Original proposal is to drop a ".0" position from, for example, "11.0.18.0.0.10" and use "11.0.18.0.10"
    i. Summary of Andreas' argument is that the first four elements of the package scheme should follow the JDK's versioning scheme (Feature.Interim.Update.Patch), and the following two should be used by Temurin as (Temurin-Build.Packaging-Build)
- #pmc channel? (Tim)
- Linux Risc-V (for Temurin-Compliance)
- https://github.com/issues?q=org%3AAdoptium+label%3APMC-agenda - add this link to the recurring agenda (for regular review)

Action items:

Date	Description	Status
2023-01-18	Owner TBC: Define process for migration from adoptopenjdk docker repositories based on ▤ AdoptOpenJDK docker deprecation strategy	Pending Tim's return
2023-01-18	George to review Adoptium website security concerns (GA/SXA/TE) for main web site, and TRSS.	In progress

Attendees:

- ☑ George Adams
- ☑ Stewart Addison (Joined at 1418)
- ☐ Carmen Delgardo (guest)
- ☑ Tim Ellison
- ☐ Severin Gehwolf
- ☑ Shelley Lambert
- ☑ Andrew Leonard
- ☑ John Oliver
- ☑ San Hong Li
- ☐ Martijn Verburg
- ☐ Lan Xia

Meeting called to order at 14:03 GMT

Minutes:
- Approval of minutes from February 22nd meeting.
  - Minutes of the previous meeting were approved.
- Review of action items from previous meetings.
  - Actions were reviewed and updated.
  - Noted that we need to keep focus on migrating users from adoptopenjdk to adoptium.
    - i. The adoptopenjdk docker images are being pushed and no longer have "latest" tag.
    - ii. The adoptopenjdk.net home page redirects to adoptium.net.
    - iii. No issues have been reported with these changes.
  - Some progress to report on the infra security report produced by EF. Many issues relate to TRSS which will be an area of focus in the coming days.
    - i. Dependabot will be enabled for TRSS shortly.
- Temurin v20 release
  - Build 36 has been created upstream, only to remove the EA designation from the version.

- ○ Scott has unofficially volunteered to be the release champion. That decision has not finalised on the release channel yet.
  - ○ Agreed that, as per the program plan, there won't be a Temurin v20 for Win32.
  - ○ George noted that MSFT will be able to assist with the testing of this release. Helped by the fact that this is a single Java version release.
  - ○ Shelley noted that we should expect to be waiting for TCK materials to be made available by Oracle given this is a new Java version and the TCK is typically a day or two after the GA is tagged.
  - ○ IBM has an automated check for the TCK availability, and this can be used to flag the same to EF infra.
  - ○ The release champion should give EF infra a heads-up about pending tasks for them to avoid surprises and ensure people are available at the right time.
    - i. This is on the release checklist already.
  - ○ Will be the first time automated release notes are produced. Need to keep an eye on that for this release to ensure it goes smoothly. Will be a pipeline job alongside SBOM validation etc.
    - i. Need to move Beth's scripts into Adoptium repos
    - ii. Need to add some tests/sanity checks for the generated artefacts
- ● Temurin RPM version naming convention.
  - ○ PMC were asked to read the thread and offer an opinion where appropriate.
- ● #pmc channel? (Tim)
  - ○ Not much private discussion on the pmc-private channel.
  - ○ Rather than create a public pmc channel consider encouraging more in the existing channels with use of "@pmc".
  - ○ Used example of platform priority list of something that would continue to be worked in private but shared in public.
- ● Linux Risc-V (for Temurin-Compliance)
  - ○ For awareness that there will be an ongoing request for RISC-V hardware controlled by the EF for use in Temurin compliance.
  - ○ Would be most suitable to use PLCT cloud based machines, and Fred (EF Infra) is setting a machine up for this purpose.
  - ○ San Hong suggested that Alibaba Cloud may have access to RISC-V machines for testing purposes. Will discuss with adoptium infra about options to provide a machine for compliance usage.
  - ○ ACTION: San Hong to investigate availability of RISC-V machine in Alibaba Cloud for Temurin compliance testing.
- ● AoB
  - ○ Shelley reminded that there is a PMC label for issues to be raised at the PMC meeting.
  - ○ Consider including this in the future meetings' agenda.
    - i. https://github.com/issues?q=org%3AAdoptium+label%3APMC-agenda - add this link to the recurring agenda (for regular review)
  - ○ <Item discussed in private session>
  - ○ Jenkins is being updated.
  - ○ Question about run rate of Azure credits. George answered the question.

   i. Those with cloud service connections asked to encourage their oganizations to provide additional machines for project usage as this will directly speed up the rate of releases.

   ii. GSoC project proposal related to cloud usage in test.

Meeting closed at 14:50 GMT
