Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2022-June-15

Agenda:
- Approval of minutes from June 8th meeting.
- Review of action items from the previous meeting.
- Consider a "Project manager role" for Adoptium
- JDK8u x64 Win build to use VS2017 (temurin-build#2967)
- Update Alpine containers to Alpine 3.16 (containers#222)
- Let'sEncrypt certificate expiry on Jenkins (infrastructure#2600)
- Early consideration of release champion for July PSU and 19GA
- Agree updating support page to reflect extending Temurin 8 to Nov 2026 and Temurin 17 to 'At least October 2027' (website-v2#661)
- Move Alpine Linux 8u port into a separate source tree - akin to 8u arm32
- Future SLSA expectations for EF projects (slsa.dev)

Action items:

Date	Description	Status
2022-03-09	ACTION: George will document how the Alpine Linux JDK8u release was built and the limitations of the current build system that required this approach.	Open

2022-04-13	ACTION: George to confirm that repo settings have been reviewed and set appropriately, and that admin rights are relinquished (or shared) accordingly. [Define per-repository configuration settings](#)	Open
2022-05-18	ACTION: George will attempt to get stats from JFrog on the number of people pulling from old/EOL distribution versions.	Completed
2022-05-18	ACTION: Sxa to hold a meeting to go through the required and actual access controls on repositories and key systems, and stored credentials.	Open

Attendees:
- ☑ George Adams
- ☑ Stewart Addison
- ☐ Hendrik Ebbers
- ☑ Tim Ellison
- ☑ Severin Gehwolf
- ☑ Shelley Lambert
- ☑ John Oliver
- ☑ San Hong Li
- ☐ Martijn Verburg
- ☑ Lan Xia

Meeting called to order at 14:01 BST

Minutes:
- Approval of [minutes](#) from June 8th meeting.
  - Minutes of the previous meeting were approved.
- Review of [action items](#) from the previous meeting.
  - Actions were reviewed and updated.
- Consider a "Project manager role" for Adoptium
  - Jie has offered to help with "project management" for Adoptium.
  - There is currently no Github access rights role for people who wish to contribute in this way. This would likely require contributor "triage" rights.
  - These rights are quite low, and necessary for managing labels, assignment of issues, etc. Such contributors cannot modify code or settings.
  - PMC are happy to grant contributor rights for this purpose.
  - ACTION: Shelley to investigate how we can assign people the contributor role for Adoptium. Maybe do-able via the Eclipse project page, otherwise it will require an EF infra request.

- JDK8u x64 Win build to use VS2017 (temurin-build#2967)
  - Proposal to upgrade the MSFT compiler from 2013 which is now out of support. Upstream are also testing on the later version.
  - Will require updating the FreeType version too as a dependency.
  - Not a compatibility breaking change, and will only be changed for Win64 (not Win32 which will remain on VS2013).
  - Discussing whether any implications for end users, believed not to be.
  - Sxa noting that this should be in the release issue for notes to end users. Will require reinstating the release note tag on an issue.
  - Discussion of whether there are additional backports of fixes required for VS2017 support - believed only to be the one in FreeType source.
  - PMC approved this change.
- Update Alpine containers to Alpine 3.16 (containers#222)
  - This is the next update in the Alpine release that we are following.
  - Appears that the release notes do not affect our usage.
  - The expectation is that we keep up with these newer OS versions.
  - PMC approved this change.
- Let'sEncrypt certificate expiry on Jenkins (infrastructure#2600)
  - Discussion about the lack of notification that updates were failing.
  - Might expect to be notified by our Jenkins job, a mail from LetsEncrypt itself, etc.
  - John noted that the Adoptium API service checks by probing that the certificate is not reaching close to the end.
  - ACTION: Johno to extend the API service to also check the CI certificate .
  - Problem would go away if CI went to a EF hosted service. That's not imminent.
- Early consideration of release champion for July PSU and 19GA
  - Sophia has kindly volunteered to be the release champion trainee for the July PSU. PMC thank her for that and have accepted the offer.
  - George has volunteered to be the release champion for 19GA release.
- Agree updating [support page](https://support-page) to reflect extending Temurin 8 to Nov 2026 and Temurin 17 to 'At least October 2027' (website-v2#661)
  - PMC approval to update these dates based upon upstream commitments in these code streams.
- Move [Alpine Linux 8u port](https://alpine-linux-8u-port) into a separate source tree - akin to 8u arm32
  - Merge conflict occurring with upstream to carry the patches for Alpine 8u ports.
  - Prefer to move this port into a separate source tree and have Adoptium build from there until the upstream status is clarified.
  - This port has not been merged to date in upstream, so moving to separate source tree keeps them distinct while the upstream decisions are made.
  - Severin reports that Stephanie is in discussion with 8u maintainers about the authorship of the patches. Still non-technical work to be completed with unknown outlook.
  - Discussion of how to move the Alpine 8u into its own source repo. Consideration of ensuring the history of previous Temurin source is not lost, possibly by forking and reverting the Alpine changes.
- Future SLSA expectations for EF projects (slsa.dev)

- - ○ Informational to the PMC that the Foundation will at some point in the future be looking to secure the software supply chain to the definitions in SLSA.
    - ○ The work of Adoptium SSDF seems to encompass the items in SLSA, so we should be in a good position to meet expectations there.
  - ● AoB
    - ○ Localization of website has restarted, with thanks to Hendrik and others.
    - ○ Noted that there are key phrases that the website can display in i18n languages that do not require full documentation translation.
    - ○ Documentation pages have duplicated ascidoc pages that need to be maintained. Key phrases in some pages are hosted in NLS resource files.
    - ○ San Hong noted that https://app.lokalise.com/ is a tool to allow volunteers to contribute to the translation of phrases in the community.

Meeting closed at 14:56 BST
