Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2022-May-18

Agenda:
- Approval of minutes from May 11 meeting.
- Review of action items from the previous meeting.
- Close out of April PSU release.
  - Release checklist (adoptium/adoptium#139)
  - Platform status (adoptium/adoptium#140)
  - Retrospective (adoptium/adoptium#138)
- SLAs or other agreements/commitments with JFrog / Docker (related to PS3.1)
- Ubuntu 22.04 support
- Automation credential security and access (ref: PMC Slack comment)
- Temurin's marketplace status
- Discussion of proposed potential change in release process

Action items:

Date	Description	Status
2022-03-09	ACTION: George will document how the Alpine Linux JDK8u release was built and the limitations of the current build system that required this approach.	Open
2022-04-13	ACTION: George to confirm that repo settings have been reviewed and set appropriately, and that admin rights are relinquished (or shared) accordingly.	Open

	Define per-repository configuration settings	

Attendees:

- ☑ George Adams
- ☑ Stewart Addison
- ☐ Hendrik Ebbers
- ☑ Tim Ellison
- ☑ Severin Gehwolf
- ☐ Shelley Lambert
- ☑ John Oliver
- ☑ San Hong Li
- ☐ Martijn Verburg
- ☑ Lan Xia

Meeting called to order at 14:04 BST

Minutes:

- Approval of minutes from May 11 meeting.
  - Minutes of the previous meeting were approved.
- Review of action items from the previous meeting.
  - Agree to hold a separate call to review the repo settings and access control.
  - Update action to reflect that it is an infra task.
- Close out of April PSU release.
  - Release checklist (adoptium/adoptium#139)
  - Platform status (adoptium/adoptium#140)
  - Retrospective (adoptium/adoptium#138)
  - AIX JDK17+ outstanding as expected. Tyler is aware and working through. All other platforms done.
  - Plan to declare the release complete.
- SLAs or other agreements/commitments with JFrog / Docker (related to PS3.1)
  - As part of SSDF documentation work seeking clarity on agreements with distributors of Temurin products.
  - JFrog is a sponsored enterprise account, so we are able to raise issues and expect commercial level support.
  - Docker is handled by official image management, guided by the Adoptium leads. No known SLA for fixes or support issues with them.
  - SSDF will reflect the current situation with both of these, and document where to raise bugs etc.
- Ubuntu 22.04 support
  - Ubuntu Jammy 22.04 went LTS last month, so discussion of Temurin support.
  - Packaging was updated, and the process will be improved in the future to ensure it is handled cleanly.

- ○ Discussion of how to handle the existing Ubuntu 20.04-based images.
  - ○ Proposal to release a 22.04 based image, and update "latest" to point to that, and leave 20.04 images there to allow for a reasonable transition time.
  - ○ Need to ensure this is shared widely through the community.
  - ○ Discussion of how to handle out of support Linux distro versions, and ensure that Temurin updates are available for security fixes.
  - ○ Severin noted that existing distros such as RHEL will stop pushing updates, without removing existing packages, and users need to be aware they are now out of alignment with the latest available.
  - ○ ACTION: George will attempt to get stats from JFrog on the number of people pulling from old/EOL distribution versions.
  - ○ Sxa pointed out that we may not be testing exhaustively on these old distros, and we need to check coverage on the 22.04 latest.
- ● Automation credential security and access (ref: PMC Slack comment)
  - ○ Sxa noted that there are a number of credentials being defined and used, and they should be more closely managed.
  - ○ Sxa has started with a list of questions that need answering for each of these credentials.
  - ○ Next step is to go through the tokens and review each in respect of those questions. Look to do that as part of the ACL meeting discussed earlier.
  - ○ Noted that this is potentially sensitive information, so will necessitate creating in the secrets repo.
  - ○ ACTION: Sxa to hold a meeting to go through the required and actual access controls on repositories and key systems, and stored credentials.
- ● Temurin marketplace status
  - ○ Plan to regularly run the converter that generates the marketplace json from the download and discovery API.
  - ○ Keep the marketplace data in Github, likely updated by a daily action.
  - ○ Continuing to gather the tap files for Temurin to include in the metadata, this will likely be a single zip artefact for all platforms in a release.
  - ○ Marketplace API is already active. Website is active on staging.
- ● Discussion of proposed potential change in release process

Meeting closed at 14:xx BST
