Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2021-August-04

Agenda:
- Approval of minutes and review of action items from the previous meeting.
- July PSU Release status from project board.
- AdoptOpenJDK API continuity duration
- Docker publication strategy clarity
- Publication/distribution of platform-specific installer packages

Action items:

Date	Description	Status
2021-06-30	ACTION: Tim to follow up about cryptography status in Temurin binaries with the EMO	Closed
2021-06-30	ACTION: Shelley to write a README for how to get to the Zenhub views of issues in the repos. for newcomers. Issue: https://github.com/adoptium/adoptium/issues/60	Open

Attendees:
❌ George Adams
✅ Stewart Addison
✅ Hendrik Ebbers
✅ Tim Ellison

✅ Severin Gehwolf
✅ Shelley Lambert
✅ John Oliver
✅ Martijn Verburg

Meeting called to order at 14:05 BST

Minutes:
- **Approval of minutes and review of [action items](#) from the previous meeting.**
  - The minutes were accepted as a true record.
  - The actions were reviewed and updated.
- **July PSU Release status from [project board](#).**
  - Project tracking now via [Zenhub board here](#).
  - Zenhub board is not up to date so was not reviewed during the meeting.
  - Installers were discussed.
    - Suggestion is to go with the new installers (LinuxNew) and distribute via the Eclipse nexus provider service in preference to jfrog.
    - Need a heads-up to Eclipse about the amount of data that would be required for Adoptium binaries.
    - ACTION: Martijn to kick-off a LinuxNew installer meeting to discuss the way forward.
  - Docker images being offered to Dockerhub for Adoptium org.
    - Waiting for Dockerhub to come back with response.
    - Images have base image of Ubuntu 20.04 and CentOS 7
    - Documentation required for people who will derive from these for additional base images. Publish on website and Slack etc.
    - Design discussion is in adoptium/containers issue #1.
  - Discussion of support for Alpine distro
    - If this is to be a secondary platform (alpine/x_64) it needs to form part of the release plan. Is currently being AQAvit tested but not scheduled for TCK testing.
    - MUSL is not supported in OpenJDK 11, expected to come back with OpenJDK 17.
  - Production of JREs
    - Agreed that there will be a Temurin 8 JRE.
    - Some discussion about the production of a module subset of OpenJDK11 to provide a runtime environment. Need to determine the JCK effort impact for doing so..
    - Proposal is that we continue with the version 11 and 16 expected behavior based upon AdoptOpenJDK usage, but stop at 17.
    - Existing pipelines can be used to create the 11 and 16 runtimes.
- **AdoptOpenJDK API continuity duration**
  - Discussion of how long the adoptopenjdk API will serve up new Temurin and Semeru binaries.
  - Plan to do so for a few releases and encourage update to new adoptium API.
  - Plan to leave the archive builds being served after migration complete.

- **Docker publication strategy clarity**
  - Was discussed earlier.
- **Publication/distribution of platform-specific installer packages**
  - Was discussed earlier for rpm and deb files.
  - MSI and Homebrew underway.
  - MSI for Temurin 8 was published but requires refresh for vendor update.
- **AOB**
  - Shelley, Hendrik, and Ben Evans discussed a developer center concept today. Ben working on the concept.
  - Hendrik is working with contributors on documentation transfer to asciidoc etc.

Meeting closed at 14:45 BST
