Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2023-Jan-18

Agenda:
- Approval of minutes from January 10th meeting.
- Review of action items from previous meetings.
- January PSU release (8u362, 11.0.18, 17.0.6, 19.0.2)
  - Release champion: Scott Fryer
  - Release checklist (adoptium/adoptium#199)
  - Release status per platform (adoptium/adoptium#202)
- Infra scan report provided by EF of Adoptium's servers
  - Ref: E-mail subject "Action required: Security issues on adoptium.net websites" Jan 6th
- Major docs overhaul (remove asciidoc and switch to MDX)
- Questions from Gerd in community call
  - Squash/merge policy
  - Headless JREs for installers
  - Branch strategy (with respect to Github actions)

Action items:

Date	Description	Status
2022-10-12	ACTION: George and Stephanie will be assigned an issue (by Martijn) to refactor the 8u repository to move Alpine support out of main and into a separate branch/repo.	Done

	Split out Alpine Port to its own repo · Issue #11 · adoptium/jdk8u (github.com)	
2023-01-10	ACTION: Sxa to check the decision to stop the adoptopenjdk docker image updates task.	Open

Attendees:

- ☑ George Adams
- ☑ Stewart Addison
- ☑ Carmen Delgardo (guest)
- ☐ Tim Ellison
- ☑ Severin Gehwolf
- ☑ Shelley Lambert
- ☑ Andrew Leonard
- ☑ John Oliver
- ☑ San Hong Li
- ☐ Martijn Verburg
- ☑ Lan Xia

Meeting called to order at 14:06 GMT

Minutes:

- Approval of minutes from January 11th meeting.
  - Minutes of the last meeting were approved.
- Review of action items from previous meetings.
  - Changes into temurin-build repo - should be able to run alpine jdk8 now
  - Deprecation of adoptopenjdk docker images. Will do one-off run to bring the up-to-date and then progress the plan that was created last year
    - 🗎 AdoptOpenJDK docker deprecation strategy
- Infra scan report provided by EF of Adoptium's servers:
  - TRSS, web server and jckservices httpd flagged
  - Will look at this later and produce remediation plan
- Docs overhaul
  - Issue to be raised about policy
  - Some things in Gatsby don't work with asciidoc
  - Large PR from George so will probably hold off til post-release as it's a lot to review (Although dependabot requires regular rebases). Reviews welcome (even just checking the preview)
- Questions from Gerd in community call:
  - Squash/merge and branch policy (may be misunderstanding on automatic merge policy)
    - i. What does each sub-project want as a default on this

      ii.   New Eclipse setup as code repo expected in Q1 will make this clearer for people and to see when changes are made

      iii.   George will enable merge commits to allow the "likely mergers" to do a merge without squash, and we will ask Gerd to add a comment if he wants this on any given PR.

- ○ Headless JREs for installers
  - i. We do not believe we had JRE installers previously, but we did have a cut down version for docker images
  - ii. No plan to progress at the moment unless there is an explicit customer request that we can assess.
- ● Release process going well:
  - ○ 11, 17 and 19 pipelines have been initiated. 8 probably frozen now but hasn't had the -ga tag applied upstream at the time of the meeting
  - ○ New processes for the Temurin Compliance team members seems to be running and going as expected
  - ○ macos still quite problematic in terms of being able to run tests smoothly
  - ○ Slightly down on team members for the TC work due to Chinese New Year in this cycle.
- ● AoB
  - ○ Code freeze github action bot - enabled on temurin-build. Do we want it on other repos/branches
    - ■ No longer required on build script repos due to branching the code?
      - ● temurin-build, ci-jenkins-pipeline and jenkins-helper now branched (but would reviewers definitely be aware that it was on the release branch when merging if the bot wasn't telling you?)
      - ● Agreed we should enable it on containers, github-release-scripts and look at the mirror repo. Installers already have it
    - ■ George to look at enabling on the release branches
  - ○ Need to check PMC access control to ensure current list is correct. As an example Lan was unable to create things in the top level adoptium repository.

Meeting closed at 14:55 GMT
