Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Adopt

Date: 2022-Nov-23

Agenda:
- Approval of minutes from November 16th meeting.
- Review of action items from previous meetings.
- Discussions with JFrog regarding Artifactory usage.
- AdoptOpenJDK API blocked by Disk quota in openshift.
- Merge blog into main website (website-v2#1175).
- AoB.
  - Informational: Release Scorecards: https://github.com/adoptium/adoptium/wiki/Adoptium-Release-Scorecards
  - AdoptOpenJDK dashboard

Action items:

Date	Description	Status
2022-07-20	ACTION: George to keep the PMC informed of progress on the repository-settings-as-code work with EF infra. https://gitlab.eclipse.org/eclipsefdn/helpdesk/-/issues/1531	In progress
2022-10-12	ACTION: George and Stephanie will be assigned an issue (by Martijn) to refactor the 8u repository to move Alpine support out of main and into a separate branch/repo.	In progress

	[Split out Alpine Port to its own branch · Issue #11 · adoptium/jdk8u (github.com)](#)	

Attendees:

- ☑ George Adams
- ☑ Stewart Addison
- ☑ Carmen Delgardo (guest)
- ☑ Tim Ellison
- ☐ Severin Gehwolf
- ☑ Shelley Lambert
- ☑ Andrew Leonard
- ☐ John Oliver
- ☑ San Hong Li(joined at 22:06PM CST)
- ☐ Martijn Verburg
- ☐ Lan Xia

Meeting called to order at 14:04 GMT

Minutes:
- Approval of minutes from November 16th meeting.
  - Minutes of the previous meeting were approved.
- Review of action items from previous meetings.
  - EF infra are progressing on the [infra as code task](#). Could be another month or so away.
- Discussions with JFrog regarding Artifactory usage.
  - There is a dashboard that shows our usage of Artifactory.
  - The Adoptium usage is not the concern, it is AdoptOpenJDK's usage that was in question.
  - Adoptium is using ~8-10TB per month in serving packages.
  - Need to encourage users to move from AdoptOpenJDK to Adoptium.
  - Need to go back with a plan.
  - Offered to add the JFrog logo to the sponsorship page, and Adoptium provide a testimonial for success on Artifactory.
  - JFrog will look at providing a CDN service for Adoptium's instance.
  - Also need to look for a longer term plan for back-up/alternate.
  - ACTION: Tim to create a migration proposal issue for moving users away from AdoptOpenJDK to Adoptium package repository.
- AdoptOpenJDK API blocked by Disk quota in openshift.
  - The AdoptOpenJDK API is no longer updating as it has exceeded disk quota.
  - This is currently running on a small disk (2Gb).
  - This is currently on RH managed OpenShift

- - - ACTION: Tim to reach out to John for mitigation plan for AdoptOpenJDK API no longer updating.
  - Merge blog into main website (website-v2#1175).
    - The blog Gatsby version is well out of date, and the dependencies are behind.
    - This has been updated, but questionable about having the blog as a separate instance to the main website.
    - Proposal is to move the blog site into the main site so we only have one to maintain.
    - Would require setting up a redirect from blog.adoptium.net
    - PMC agreed that this would be a good plan.
  - AoB.
    - Informational: Release Scorecards: https://github.com/adoptium/adoptium/wiki/Adoptium-Release-Scorecards
      - These generate information about duration between tags created and releases available. This will help guide us to pipeline optimizations.
    - The trends view in AdoptOpenJDK dashboard was broken (now fixed). This is being used to track migration to Adoptium.
    - Solaris 11 -based builds being checked for ability to build OpenJDK 8. Work is in progress.

Meeting closed at 14:35 GMT
