# Adoptium
# Project Management Committee
# Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

---

**Date:** 2022-July-13

**Agenda:**

- Approval of minutes from July 6th meeting.
- Review of action items from the previous meeting.
- July 2022 PSU release status
  - Expected OpenJDK tag date is July 19 (next Tuesday)
  - Release status per platform (adoptium#153)
  - Release checklist (adoptium#152)
  - Version priority: 11, 17, 8, 18 (or 17 first?)
- Skip github actions builds to save executors (jdk#7)
- Equinix migration to new data centres (infrastructure#2666)
- Freetype update for jdk8 windows

**Action items:**

| Date | Description | Status |
|------|-------------|--------|
| 2022-03-09 | ACTION: George will document how the Alpine Linux JDK8u release was built and the limitations of the current build system that required this approach. | Open |
| 2022-07-06 | ACTION: Mission Control PMC to contribute to the project progress review requested by the EMO | In progress |

| 2022-07-06 | ACTION: Stephanie to investigate the difference in ECC algorithms available in the Alpine MUSL 8u build ([temurin-build#3002](#)) | In progress |
|---|---|---|
| 2022-07-06 | ACTION: George will raise discussion with EF infra for elevating PMC's permissions to repository owner. | In progress |
| 2022-07-06 | ACTION: Sxa to review the process to allow AdoptOpenJDK secrets repository to come into Adoptium as a private repo. ([infra#2661](#)) | In progress |

**Attendees:**

- ☑ George Adams
- ☑ Stewart Addison
- ☐ Hendrik Ebbers
- ☑ Tim Ellison
- ☑ Severin Gehwolf left at 14:30 BST
- ☐ Shelley Lambert
- ☑ John Oliver
- ☑ San Hong Li from 14:18 BST
- ☑ Martijn Verburg
- ☑ Lan Xia

## Meeting called to order at 14:02 BST

## Minutes:

- Approval of minutes from July 6th meeting.
    - Discussion of hosting the centos-family RPMs on different paths in the repo. While we test on various variants including Rocky, this is not a formally supported distro.
    - Ref: https://github.com/adoptium/installer/issues/499#issuecomment-1180732816
    - Would be the same RPM, just available under different names.
    - Ensure that the install instructions reflect this, and comments on the Jenkins file are not misleading about supported platforms [https://adoptium.net/installation/linux#_centosrhelfedora_instructions](https://adoptium.net/installation/linux#_centosrhelfedora_instructions)
    - Plan to take out the numerous paths and recommend using 'rhel' path in future.
    - Noted that aliases would require a name and version, so end users would have to know which RHEL version their particular distro maps onto - perhaps no version required.
    - Consider this a documentation task to show mapping from (rhel-like distribution and distro-version) to (rhel and rhel-version).

- ○ ACTION: Martijn to create a new installer issue to explore the options and strategy going forward for publishing the same RPM under different distro paths in the packages.adoptium.net repo.
  - ○ Minutes of the previous meeting were approved.
- Review of [action items](#) from the previous meeting.
  - ○ Mission control are progressing their progress review.
  - ○ Stephanie is looking into a potential fix for ECC differences.
  - ○ EF strongly opposed giving the PMC "owner" permissions on project repositories, but welcomed the idea of having a code definition of settings where the PMC can open PRs for them to apply. This is being prototyped and discussed with EF admin at the moment.
  - ○ ACTION: George to keep the PMC informed of progress on the repository-settings-as-code work with EF infra.
- July 2022 PSU release status
  - ○ Expected OpenJDK source tag date is July 19 (next Tuesday)
  - ○ Release status per platform issue opened ([adoptium#153](#))
  - ○ Release checklist opened ([adoptium#152](#))
  - ○ Agreed version priority for resources will be 17, 11, 8, 18, but will run any version through as soon as we get the tags rather than wait in this order.
- (Severin left at this point)
- Freetype update for jdk8 windows
  - ○ JDK8 requires Freetype 2.8.1
  - ○ Overdue to get this fix into the upstream, even though vendors are moving to the later Freetype version 2.9.1.
  - ○ Noted that the CVE is a longstanding issue, which should be documented to end users, but decision is too risky to change it now and promote changes upstream.
  - ○ DECISION: do not upgrade the Freetype version in this Temurin release.
- Skip github actions builds to save executors ([jdk#7](#))
  - ○ Note to the PMC that nearly 80% of GitHub actions usage is due to actions on mirrors.
  - ○ Either disable the actions on the repos settings, or reconfigure to avoid running on the dev and release branches which are changing with incoming mirroring.
  - ○ Agreed that we will leave in place for non-dev/non-release branches in case any PR branch is created (rarely) so that it is tested.
  - ○ Will leave the changes until after the current release to ensure stability. Sophia should be announcing the freeze imminently.
  - ○ Tracked as [infrastructure#2681](#)
- Equinix migration to new data centres ([infrastructure#2666](#))
  - ○ Formally "Packet", the services we have are being migrated to the new Equinix cloud centers. This requires destroying and recreating machines.
  - ○ Not a significant undertaking as our infrastructure-as-code enables quick reconfiguration of machines in this way. Also an opportunity to clean up any unused or fragmented machine usage.
  - ○ Noted that we do need to maintain the x64 Solaris machine provision. ARM is not affected by this move.
  - ○ Again, this is going to be post release.

**Meeting closed at 14:42 BST**
