Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2022-April-13

Agenda:
- Approval of minutes from March 30 meeting.
- Approval of statement for April 6 meeting.
- Review of action items from the previous meeting.
- Status update for Java 18 GA (jdk-18+36) release.
  - Release checklist (adoptium/adoptium#130)
  - Platform status (adoptium/adoptium#131)
  - Release notes on new website
- Whether to list non-LTS versions on homepage.
- Status of MacStadium machines vs orka
- Process and documenting adding/removing people to Jenkins access control.
- Moving AIX JDK11 to xlc16
- Container patching policy (adoptium/containers#162)
- Add more people to Temurin-compliance committer team (vote in mailing list)

Action items:

Date	Description	Status
2022-03-09	ACTION: Shelley to start conversations on how to provide feedback to the OpenJDK community on AIX development branch testing.	In Progress
2022-03-09	ACTION: George will document how the Alpine Linux JDK8u release was built and the limitations of the current build system that required this approach.	Open
2022-03-30	ACTION: sxa to attempt to enable MacOS/aarch64 in the JDK11 build pipelines.	Completed
2022-03-30	ACTION: sxa to improve wording to help people find the latest release (JDK18)	Completed

Attendees:
- ☐ George Adams
- ☑ Stewart Addison
- ☐ Hendrik Ebbers
- ☑ Tim Ellison
- ☑ Severin Gehwolf
- ☑ Shelley Lambert
- ☑ John Oliver
- ☑ Martijn Verburg (from 14:16)

Meeting called to order at 14:06 BST

Minutes:
- Approval of minutes from March 30 meeting.
  - Minutes of the meeting were approved.
- Approval of statement for April 6 meeting.
  - The statement was approved.
- Review of action items from the previous meeting.
  - Some discussions are happening about how to provide development feedback to OpenJDK from Adoptium build systems.
  - Initial focus is on ensuring the health of the AIX codebase with IBM assistance, but also consideration of wider feedback.
  - At this time no organized alignment between the testing that occurs at Adoptium and the developer testing at OpenJDK.
- Status update for Java 18 GA (jdk-18+36) release.

- ○ Release checklist ([adoptium/adoptium#130](#))
- ○ Platform status ([adoptium/adoptium#131](#))
- ○ Release notes on new website
- ○ All platforms shipped except AIX. Release notes outstanding. These are a topic for further discussion on the website issues list.
- ○ Discussion of using foojay.io for release notes, but noted this is not open.
- ○ OpenJDK maintainers and others publish the data already.
- Whether to list non-LTS versions on the homepage.
  - ○ Agreed to keep the download button for LTSes and reference the non-LTS releases.
- Status of MacStadium machines vs orka
  - ○ Waiting for George's input.
- Process and documenting adding/removing people to Jenkins access control.
  - ○ Desirable for people to be able to launch Jenkins jobs, including students and others who are not committers but have touch-points with the project.
  - ○ This list is currently being managed as an AdoptOpenJDK Git team. No easy parallel in Eclipse team structures.
  - ○ Noted that Jenkins update is stable, and time for a cleanup of some old jobs.
- Moving AIX JDK11 to xlc16
  - ○ IBM and SAP upstream in OpenJDK seem happy to move to this later version, which comes with new runtime requirements.
  - ○ Agreement to follow along with the new dependency introduced at the appropriate time. There is a PR for this ready to go.
- Container patching policy ([adoptium/containers#162](#))
  - ○ Dockerhub official images don't patch the underlying OS layers. They publish an n and n-1 version image.
  - ○ Community has pointed out that we have images with known CVEs.
  - ○ Further investigation for how to identify that updated base images have fixed CVEs and use that to trigger the Adoptium images. Likely to be on a vendor-specific basis.
  - ○ Will continue to work through the issue.
- Add more people to Temurin-compliance committer team (vote in mailing list)
  - ○ The Eclipse process for adding team members to this project is poorly defined and opaque.
  - ○ EMO (WB) would like us to move to an election process.
  - ○ Shelley sent a request to the EMO for clarity on how to proceed on this task.
- AoB
  - ○ Review the existing committer list and move some to historical.
  - ○ Questioning state of special administrative permissions for Adoptium repositories.
  - ○ ACTION: George to confirm that repo settings have been reviewed and set appropriately, and that admin rights are relinquished (or shared) accordingly.
  - ○ Adding MacOS/aarch64 to the April PSU release.
    - ■ Code is ready to go, there is a resource implication for TCKing.
  - ○ Priority ordering for April PSU release is 17, 11, 8, 18 and focus on primary platforms Linux/x64, Windows/x64, MacOS/x64.
  - ○ Expected date is Tuesday April 19th for April PSU tagging, and Adoptium code freeze will be this weekend.

- ○ Haroon is the release champion in-training with both sxa and Shelley providing assistance and oversight.
- ○ Continued dependency on Eclipse for access to the JCK materials. Staffing absence may be a delay. Plan to share forward calendars with them.

Meeting closed at 14:55 BST
